FOREWORD

Nursery and Primary Education is the foundation of sustainable learning. It is on this basis that Cameroon has ratified several conventions related to compulsory education. These conventions range from the Jomtien Education Framework of 1990, the Salamanca Statement of 1994, the Dakar Framework of 2000 to the Incheon Declaration of 2015 precisely the fourth Sustainable Development Goal (SDG4).

Besides these international conventions, the Constitution of the Republic of Cameroon guarantees the right of the child to education and further highlights it in the1998 Law to Lay Down Guidelines for Education. In view of becoming an emergent nation by the year 2035, the government developed the Growth and Employment Strategy Paper (GESP) in 2009 to provide major orientations to all sectors of the society. The document tasked ministries in charge of education to develop the human capital required to attain this vision. The 2013-2020 Education and Training Sector Strategy Paper (ETSSP) clearly defines the missions of each sub-sector in the educational system.

This curriculum is designed to guide the development of knowledge, skills and attitudes in the learners and to set the foundation for learning with emphasis on Science, Technology, Engineering and Mathematics (STEM). The curriculum therefore responds to one of the key missions assigned to the Ministry of Basic Education (MINEDUB).

This new pedagogic tool replaces the one of 1987 for the nursery and that of 2000 for the primary. My fervent wish is that the entire education community explores and makes maximum use of this document in order to enable the nursery and primary school learners attain knowledge-based, skill-based and attitude-based proficiencies upon graduation. In this way, they will be able to cope with the different educational and/or professional options available to them at the end of the primary school cycle and embrace lifelong learning, no matter the post-primary path they choose.

The Minister of Basic Education

PREFACE

This curriculum has taken into consideration the fact that learners have unique personalities, talents, attitudes, and interests that they bring into the classroom. They also have a variety of experiences which the teacher must build on, in order to effect and affect the teaching – learning process. The learners' uniqueness and variety of experiences are primordial in the development of any school curriculum. Analyses of curricula that have been successful in many countries throughout the world suggest that appropriate curriculum design should:

- involve parents in their children's education
- develop an atmosphere based on sound human relationships
- establish a balance between child-directed and teacher-directed activities
- specify objectives and needs of individual learners
- emphasise on pragmatic and play-based learning in pre-primary and primary education

Basic Education moulds learners and encourages them to be dynamic and creative. Hence, the 1996 Constitution of the Republic of Cameroon clearly spells out the State's engagement in guaranteeing the child's right to education. Cameroon also adheres to the Human Rights Declaration and related legal instruments. Every child is endowed with learning potentials which need to be awakened and guided by appropriate instruction and instructional materials. Consequently, the Ministry of Basic Education (MINEDUB) has undertaken a massive reform of the Nursery and the Primary school curricula, an activity that aims at ensuring quality basic education for all Cameroonian children. This will therefore serve as an important reference and working document for teachers and the entire education community.

In order to render the curriculum standard and to guarantee quality assurance, the following phases and procedures were followed:

- writing and validating the Cameroon National Core Skills Framework
- carrying out needs analysis
- writing and validating the Curriculum Framework
- training of 105 writers by consultants
- writing the first draft
- reading and evaluating the first draft by the scientific committee
- integrating the recommendations and suggestions of the scientific committee
- experimenting the curriculum in all the ten regions of Cameroon
- integrating the recommendations and suggestions from the field
- re-evaluating the curriculum by the scientific committee
- integrating the recommendations and suggestions from the scientific committee
- reviewing the curriculum by the consultants and the scientific committee
- finalising and validating the curriculum

The inclusive nature of this document therefore makes it user-friendly, thus, the classroom teachers should be able to claim ownership of it and be totally accountable for its implementation.

It is also worth noting that priority was given to national expertise by working with two renowned consultants representing the language of instruction of the two subsystems.This was done in strict respect of the specificities of the two subsystems of education in conformity with the provisions of the 1998 Law to Lay Down Guidelines for Education in Cameroon. Following the recommendations of the Curriculum Framework, the two subsystems have the same domains, weighting, core skills and broad-based competences, and activities for the nursery cycle and subjects for the primary cycle.

However, each subsystem has maintained its specificities with regards to learning strategies/methods, teaching-learning materials, and assessment strategies and tools.

As a matter of fact, this is a hands-on document aimed at rendering the job of the classroom practitioner lighter and more enjoyable. The annual time allocation has been calculated and activities for the Nursery school as well as subjects for the Primary school cycle identified and built under appropriate domains. The competences from the National Core Skills Framework to be developed by each subject area have also been clearly stated. Besides, the activities and/or subjects are technically distributed to represent the weighting that was hitherto given to the various domains. The major teaching-learning approach: the Project Based Learning which is supported by the Integrated-Theme Learning and the Cooperative Learning strategies has been explained. Furthermore, the importance of assessment is reiterated in order to encourage the classroom teacher to constantly exploit and maximise its use. A glossary is provided to situate the user on the contextual use of some key concepts.

Summarily, the ADDIE Model guided the entire process of the curriculum development as follows:

A for the **A**nalysis phase, explains the situational analysis (teachers, learners, supervisors, education community)

D for the **D**esign phase, focuses on the structure of teaching-learning and assessment of learning outcomes

D for the **D**evelopment phase, is where the writing and re-writing of all the planned activities in the design phase are carried out

I for the **I**mplementation phase, covers the period of the experimentation. This period offers feedback for revision

E for the **E**valuation phase, is where plans for the evaluation of the entire curriculum are made as it is progressively being used

It is worthy to mention here that globalisation has severely impacted contemporary instructional processes. Increasingly, our society is rocked by various challenges which include economic recession, advancing technologies, changing family relationships, violence in communities, exclusion, intolerance and identity crisis. These issues constitute a serious hurdle to pedagogues who must derive appropriate strategies to handle them. Educators and parents are, therefore, called upon to embrace this important change and to work in harmony. Learners are expected to acquire necessary life skills such as autonomy, honesty, adaptability to technological changes, respect for self, respect for others and respect for institutions, as well as the 21st century skills: collaboration, teamwork, creativity, problem solving and critical thinking for effective lifelong learning.

GENERAL INTRODUCTION

In 1990, the World Conference on Education For All (EFA) which held in Jomtien, Thailand, made a clarion call for universal quality primary education. During this conference, emphasis was laid on access, equity and quality primary education for all. Apart from declaring that "Education is the fundamental right for all people, women and men of all ages throughout the world", the EFA conference also underscored that

...active and participatory approaches are particularly valuable in assuring learning acquisition and allowing learners to reach their fullest potentials. It is, therefore, necessary to define acceptable levels of learning acquisition for educational programmes and to improve and apply systems of assessing learning achievement.

A decade after Jomtien, in the year 2000, the World Education Forum held in Dakar, Senegal where the Dakar Framework for Action focused, among others, on *"*HIV/AIDS, early childhood education, school health, education of girls and women, adult literacy and education in situations of crisis and emergency*"*. To further expand on the education agenda of Jomtien, the Dakar meeting, after careful evaluation, extended the scope of educational imperatives to include:

- *Expanding and improving comprehensive early childhood care and education, especially for the most vulnerable and disadvantaged children*
- *Ensuring that by 2015, all children, particularly girls, children in difficult circumstances and those belonging to ethnic minorities, have* ***access to and complete free and compulsory primary education of good quality***
- *Ensuring that the learning needs of all young people and adults are met through equitable access to* ***appropriate learning and life-skills programmes***
- *Achieving a 50 per cent improvement in levels of adult literacy by 2015, especially for women, and equitable access to basic and continuing education for all adults*
- *Eliminating gender disparities in primary and secondary education by 2005 and achieving gender equality in education by 2015, with a focus on ensuring girls' full and equal access to and achievement in basic education of good quality*
- *Improving all aspects of the quality of education and ensuring excellence of all so that recognized and measurable learning outcomes are achieved by all, especially in literacy, numeracy and essential life skills.*

There was renewed zeal to move the agenda of education forward as key stakeholders to the course of education at the World Education Forum 2015 in Incheon, Korea declared that:

> *building on the legacy of Jomtien and Dakar, this Incheon Declaration is a historic commitment by all of us to transform lives through a new vision for education, with bold and innovative actions, to reach our ambitious goal by 2030. Our vision is to transform lives through education, recognizing the important role of education as a main driver of development and in achieving the other proposed SDGs. We commit with a sense of urgency to a single, renewed education agenda that is holistic, ambitious and aspirational, leaving no one behind.*

In order to meet up with these education milestones, Cameroon had to carry out major actions which included the writing of syllabuses on HIV/AIDS, on Human Rights and on ICTs. Furthermore, the revision of curricula to align with the provisions of the Incheon World Education Forum became imperative.

The vision of the new curriculum falls in line with the SDG4 which seeks to ensure inclusive and equitable quality education and promote lifelong learning for all with focus on access, equity and inclusion, quality and learning outcomes within a lifelong learning approach. This is in line with the vision of the Education Forum which states that by 2030, all girls and boys should be able to complete free, equitable and quality primary and secondary education leading to relevant and effective learning outcomes. Access to quality early childhood development, care and pre-primary education should be granted so that children are ready for primary education. By the same token, all men and women should have affordable and quality technical, vocational and tertiary education, including university; and the number of youths and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship should be substantially increased.

In addition, the vision of the Continental Education Strategy for Africa (CESA 2016-2025), reorienting "Africa's education and training systems to meet knowledge, competencies, skills, innovation and creativity required to nurture African core values and promote sustainable development at the national, sub-regional and continental levels" has carefully been addressed in this curriculum. The present curriculum reform, taking its cue from these instruments, is an attempt to respond to current trends so as to provide an education, from early childhood, that would address the needs of each child through the development of their mind-set. This is in corroboration with the law to Lay Down Guidelines for Education in Cameroon (1998) which states in Article 4 that ***the general aim of education is to ensure the intellectual, physical, civic and moral development of the child as well as its economic, socio-cultural, political and moral integration in the society***.

Nonetheless, faced with the problem of quality and the phasing out of the Cameroon Primary School Syllabuses for both subsystems, which date as far back as 2000, the building up of a new curriculum became a necessity.

The concerns raised by the International, Continental and National instruments reviewed above, were addressed in the National Core Skills Framework: communication in the two official languages, (English and French), and the use of at least one national language; use of basic notions in Mathematics, Science and Technology; practice of social and citizenship values; demonstration of the spirit of autonomy, a sense of initiative, creativity and entrepreneurship; use of basic Information and Communication Technology concepts and tools; pratice of lifelong learning; and the practice of Physical, Sports and Artistic activities. These National Core Skills are hinged on the Broad-Based Competences namely: intellectual, methodological, personal and interpersonal, and communication competences. The National Core Skills Framework constitutes the springboard of this curriculum.

The curriculum is presented in three parts. Part One gives an overview of the document, Part Two defines the domains and the subjects, while Part Three provides the contents of the syllabus.

PART ONE

OVERVIEW

This section presents the learner's profile at the end of primary school in Cameroon, the domains and subjects, the competences to be developed, the integrated learning themes, the pedagogical approaches, assessment strategies, weighting and the time allocated to the different subjects.

The Learner's Profile

The Ministry of Basic Education intends to develop the knowledge, skills and attitudes of learners under its authority. At the end of the primary school cycle, the learner is expected to have acquired national core skills in view of stepping into secondary school or engaging in other learning contexts or activities. Furthermore, the learner must equally have acquired key values in the five domains. On a similar note, they should show interest in learning all the subjects.

The Cameroon Education System outlines seven National Core Skills which should be acquired by the end of both nursery and primary cycles of education. They include:

1. ***Communication in the two official languages (English and French) and the use of at least one national language***
   Communication in English, in French and in at least one National Language implies the ability to use the four language skills of these languages. The learner should be able to listen, communicate orally, and be able to read and to write. The language competence is a prerequisite for access to other core skills.

2. ***Use of basic notions in Mathematics, Science and Technology***
   Introducing notions of Mathematics, Science, and Technology involves the acquisition of knowledge, skills and attitudes in these subjet areas and the ability to use them to address challenges in real life situations.

3. ***Practice of Social and Citizenship Values (morality, good governance and budgetary transparency)***
   This involves inculcating patriotic, moral, citizenship values and values of good governance in the learners of both cycles so as to prepare them for a harmonious insertion into the society.

4. ***Demonstration of the Spirit of Autonomy, a Sense of Initiative, Creativity, and Entrepreneurship***
   Developing this competence in the learner calls for the assembling of multidisciplinary knowledge and skills in view of developing the learners' social integration skills, creativity as well as managerial and entrepreneurial potentials.

5. ***Use of Basic Information and Communication Technology Concepts and Tools***
   Generally, this core skill requires the use of information and communication technology tools in school and in society. It is related to healthy, safe and responsible use of various ICT devices for learning and for leisure activities. In addition to this, it develops logical and critical thinking, automated management of information (analysing, summarizing, and assessing), and apt communication skills.

6. ***Practice of Lifelong Learning***
   This implies that the learner will demonstrate the desire and the will to continue education and organize self, especially through efficient time and information management.

7. ***Practice of Physical, Sports and Artistic Activities***
   This competence provides learners with a platform to develop their physical, psycho-motor, artistic, personal and interpersonal skills as well as improve their wellbeing. It enables them to acquire knowledge, skills and attitudes required for their participation in various physical, psycho-motor, sports and leisure activities in order to strengthen social harmony and ensure a healthy lifestyle.

Broad-based Competences

In addition to acquiring the National Core Skils at the end of Primary Education, pupils should equally exhibit the four broad-based competences namely:

1. Intellectual competences

Intellectual Competences include**:**

- exploiting information
- solving problems
- acquiring logical thinking and a sense of observation
- exercising critical judgement
- practising creative and innovative thinking

2. Methodological competence

Methodological competences include:

- giving self efficient working methods
- exploiting information and communication technologies
- organizing learning
- arousing the desire to learn each subject

3. Personal and interpersonal competences

Personal and interpersonal competences enable the learner to:

- develop his/her personality
- acquire abilities in view of his/her socio-cultural integration and individual fulfilment
- cooperate with others

4. Communication competences

Communication competences enable the learner to:

- communicate in an appropriate manner in the two official languages
- communicate in at least one national language

Domains, Weighting, Competences and Subjects

In Table 1 that follows, the domains and their weightings are provided. The competences from the National Core Skills Framework that each domain develops are indicated and the subjects that are needed to develop these competences are equally listed.

Table 1: Domains, Weighting, Competences to be Developed and Related Subjects

N°	Domain/Weighting	Competences to be Developed	Subjects
1	Basic knowledge (60%)	- Communication in the two official languages (English and French) and use of at least one national language - Use of basic notions in mathematics, science and technology - Practice of lifelong learning - The four broad-based competences	- English Language and Literature - Mathematics - Science and Technology - *Français*
2	Communal life and national integration (5%)	- Practice of social and citizenship values (morality, good governance and budgetary transparency) - Practice of lifelong learning - The four broad-based competences	- Social Studies
3	Vocational and life skills (20%)	- Demonstration of the spirit of autonomy, a sense of initiative, creativity, and entrepreneurship - Practice of physical, sports and artistic activities - Practice of lifelong learning - The four broad-based competences	- Vocational Studies - Arts - Physical Education and Sports
4	Cultural identity (5%)	- Practice of lifelong learning - The four broad-based competences	- National Languages and Cultures
5	Digital Literacy (10%)	- Use of basic information and communication technology concepts and tools - Practice of lifelong learning - The four broad-based competences	- Information and Communication Technologies (ICTs)

The curriculum is learner - centred and is based on the development of skills needed to meet the challenges of contemporary Cameroon in particular and the world at large. The syllabuses are presented in three levels: Level I (class 1 and class 2), Level II (class 3 and class 4) and Level III (class 5 and class 6). In all, ten subjects have been identified from the five domains namely: English Language and Literature, Mathematics, Science and Technology, French, Social Studies, Vocational Studies, Arts, Physical Education and Sports, National Languages and Cultures, and Information and Communication Technologies (ICTs). Details about these subject areas (expected learning outcomes, content areas, suggested methods and didactic materials) are laid out in Part Three.

Integrated Learning Themes (ILTs)

In order to make learning relevant to daily life, eight integrated learning themes have been identified to develop skills necessary for the harmonious integration of learners in the society. The ILTs for the primary school cycle are presented in table 2.

Table 2: Integrated Learning Themes

Level I	Level II	Level III
- The home	- The home	- Nature
- The village/town	- The village/town	- The village/town
- The school	- The school	- The school
- Occupations	- Occupations	- Occupations
- Travelling	- Travelling	- Travelling
- Health	- Health	- Health
- Games	- Games	- Sports and leisure
- Communication	- Communication	- The universe and space

The use of integrated learning themes represents the fundamentals of project-based learning. They facilitate the learning-teaching process and make the essence of PBL come to light. The process entails integrating themes that have been developed in order to facilitate teaching-learning in the Primary School. These themes will constitute the basis of contextualizing the concepts of the subjects. Integrated learning themes are the foundation on which all the activities for a defined period of time within the school year are expected to take place. This can be done for some weeks, months or beyond and has a direct impact on project-based learning. An integrated approach unites all subjects and gives opportunities to the learners to learn more through variant contents. Children will consequently develop a deeper understanding of contents in their local contexts.

The approach allows learners to explore, gather, process, refine and present information. It also allows learners to engage in purposeful and relevant learning. Learners are expected to see the interconnectedness within curriculum areas. It is based on skill development around a particular theme that is relevant to the pupils in the class.

Pedagogic approaches

Teaching methods are special procedures through which educational goals are attained. The Cameroon education system has experienced pedagogic evolutions from the Objective-based Approach (OBA) through the Inferential Thinking Approach, that was referred to as "New Pedagogic Approach" to the Competence-based Approach (CBA) or the Behavioural Objective-based Approach which is in use today. The CBA facilitates the development of skills through the practice of Project Based Learning, Cooperative Learning and Integrated Theme Learning. The underlying philosophy of the CBA requires that learning should be based on the potentials of the learner. The learner should be responsible for his/her own learning. Focus is on learning and not on teaching. It is important for the classroom teachers to diligently determine the characteristics of their learners. Lesson preparation should always implicitly or overtly provide for gender equity, for inclusiveness and for multiple intelligences.

The pedagogic practices that make the learners more responsible for their own learning include:

Project-Based Learning (PBL)

Project-based learning is a pragmatic approach to learning in which learners create their own knowledge through learning activities built around intellectual inquiry and a high degree of engagement with meaningful tasks. Projects are designed to allow learners with a variety of different learning styles to demonstrate their acquired knowledge, skills and attitudes. Therefore, a well-designed Project-Based Learning activity is one which addresses different learning styles and does not assume that all learners

can demonstrate their knowledge, skills and attitudes in a single or standard way. It is an effective way of connecting classroom activities to the real world through a process of integrating the four broad-based competences in the learner's life**.** PBL is an "investigative" or "discovery" type of learning. It is a research-based method of learning, wherein, together with the learners, questions are asked, investigated and solutions proposed and presented.

Commitment to project-based learning enables the learner to solve many problems and makes the teaching-learning process more skill-based. In practical terms, PBL can be implemented in the following ways:

1. Identify a problem: This has to be done together with the learners in order to give them ownership of their learning and of the final product which will be the project. Once a problem is identified, a project is designed to bring about a solution to the said problem.

2. Identify all the parts of a project namely: Beginning, progression and a culminating event. That is, you should master how to start off with the project because as mentioned earlier, it should be a process that involves learning across the curriculum or better still, across all subjects. There is a progression part in a project in Project-Based Learning in order to show that the project is not an end in itself but a means to an end. This implies that the subjects are taught in order to enable the learner either solve a problem or produce something concrete.

3. Brainstorm with colleagues about the progression and set aside a "Project Book" where ideas are jotted down. Points about the progress of the project should equally be jotted (monitoring progress). This enables the actors in the project to see what is working and what is not working and reformulate questions and bring out more concrete solutions. This will also lead or aid in the culmination event where the entire process will be explained.

4. Discuss with learners. Learners are skilfully guided both in class and at the project site towards the realisation of the project. The learner's place should not be taken up by the teacher; they should be guided to complete or carry out tasks as individuals and as groups as the case may be. The tasks should not be carried out for them: leading questions and clues are vital in helping them carry out their tasks.

5. Assign a role to every learner. No learner should feel isolated or abandoned nor left behind. Assigning roles empowers them and builds the spirit of togetherness, initiative, creativity and responsibility in the learner.

6. Discuss the progress of the project with individual learners, groups and with the whole class. Discussing the progress of the project entails participation, improving on aspects that are lacking and making the project participants (learners) feel anxious to complete the task/solve the problem.

7. Respect all the three parts of the project, that is, introduction (identifying a problem and proposing a solution, that is, a project), progression (carrying out the project) and the culmination event (presenting and evaluating the project).

   NB: The culmination event is paramount and should not be left out. It must be a presentation by the learners while the teacher evaluates the success of the project with the help of the points in the "Project exercise/note book". Project-based learning helps the teacher to assess learners as many times as the need arises.

Benefits of Project-based Learning

Project-based learning:

- promotes lifelong learning skills
- enhances logical thinking
- promotes team spirit and hard work
- promotes entrepreneurial skills
- promotes bonding and interaction
- creates responsible attitudes in learners
- helps learners to manage their resources
- motivates learners
- builds confidence in learners
- renders learning practical
- situates learning in a real life situation
- makes learners inquisitive/curious
- develops problem-solving skills in learners
- improves on learners communication skills
- makes the task of assessment and evaluation for the teacher easier and more enjoyable

Cooperative Learning (CL)

Cooperative learning is a specific kind of collaborative learning. In cooperative learning, pupils work together in small teams on a structured activity. They are individually accountable for their work, and for the work of the group as a whole. The Integrated Theme Learning and Cooperative Learning are supporting strategies of the PBL.

The strategy consists of putting learners into small, mixed-ability learning teams. They are responsible not only for learning the contents in question, but also for helping their teammates learn. The most amazing thing here is that the learning process becomes a web, wherein you do not succeed alone. The learners must be made to understand that if one person fails, the entire team/boat sinks, and if one person succeeds, the success affects everyone else. Within cooperative learning teams, pupils discuss the material to be learned with one another, and support each other to understand it, and encourage and help one another to have a clear understanding of their participation. Teams differ from groups because cooperative learning is constituted of teams whereby:

- goals are shared
- information is circulated
- roles are assigned
- materials are managed
- teammates depend on one another to complete tasks successfully
- pupils learn to respect each other's contributions and opinions
- pupils engage in "cognitive collaboration." They must organize their thoughts to explain ideas to teammates
- pupils have fun while learning
- pupils' social nature is used to their advantage
- social, leadership, communication, decision making, problem solving, and conflict resolution skills are developed

Assessment

Assessment is the process of passing judgements on learners' knowledge, skills and attitudes with the sole aim of making decisions about their education. It is an integral part of the teaching-learning process in the Primary School and constitutes part of the curriculum. Assessment is a means of objectively informing parents, guardians and policy makers on learners' progress in school.

Diverse tools should be used to collect information about the learner in order to moderate and increase learners' chances of learning from one another. Nevertheless, learners must be assessed fairly and at the same time taking into consideration that each learner has their learning styles. Consequently, all the learners may not always be at the same level of attaining the expected learner outcome.

Assessment in primary schools in Cameroon can take three forms (oral, written, practical). There are many ways through which information can be gathered about learner's progress. This can be done through: observation checklists; learner's self-assessment; daily practical assignments; samples of learner's work; learner's willingness to participate and contribute in projects/conferencing; oral and written quizzes; portfolios; willingness to be involved in class and school activities.

It is worth stating that formative and summative assessment should take into consideration knowledge, skills and attitudes as indicated on the "Expected Learning Outcomes" column of each subject.

Types of Assessment

Diagnostic Assessment: This type of assessment verifies what the learner already knows and it is used to improve on the learner's achievement. Hence, each time we have to embark on a learning and teaching experience, we must always try to find out learners' level of competence and/or knowledge, skills and attitudes about the new material. This helps the teacher develop strategies and activities that can be used to facilitate learning.

Formative Assessment: This type of assessment keeps the learners in permanent interaction with the curriculum during the teaching-learning process. It is designed to keep track of learners' learning achievements. Their response to this type of interaction equally helps the curriculum user (the teacher) to provide feedback to both the learner and the parents.

Summative Assessment: It is carried out periodically to show the level of attainment of expected learning outcomes at the end of the term, year, level or cycle. It is a more judgmental kind of assessment. Whatever the case, summative assessment must not always be standardized tests. There is need for a variation in the use of assessment instruments.

Weighting and Time Allocation

Tables 3, 4, 5 and 6 present the weighting and time allocation for the single shift and the double shift systems.

Table 3: Annual Learning Time in Hours per Level and Subject Area for the Single Shift System

Subject Area	Level 1	Level 2	Level 3
English Language and Literature	172.5	172.5	138
Mathematics	69	69	103.5
Science and Technology	69	69	103.5

Link between the Learning Domains and the National Core Skills/Broad-based Competences

Generally, the Cameroon education-vision that is expressed in the National Core Skills Framework is realised through PBL and ILT carried out in the subject areas that are lodged in the five domains. This is illustrated in figure 1.

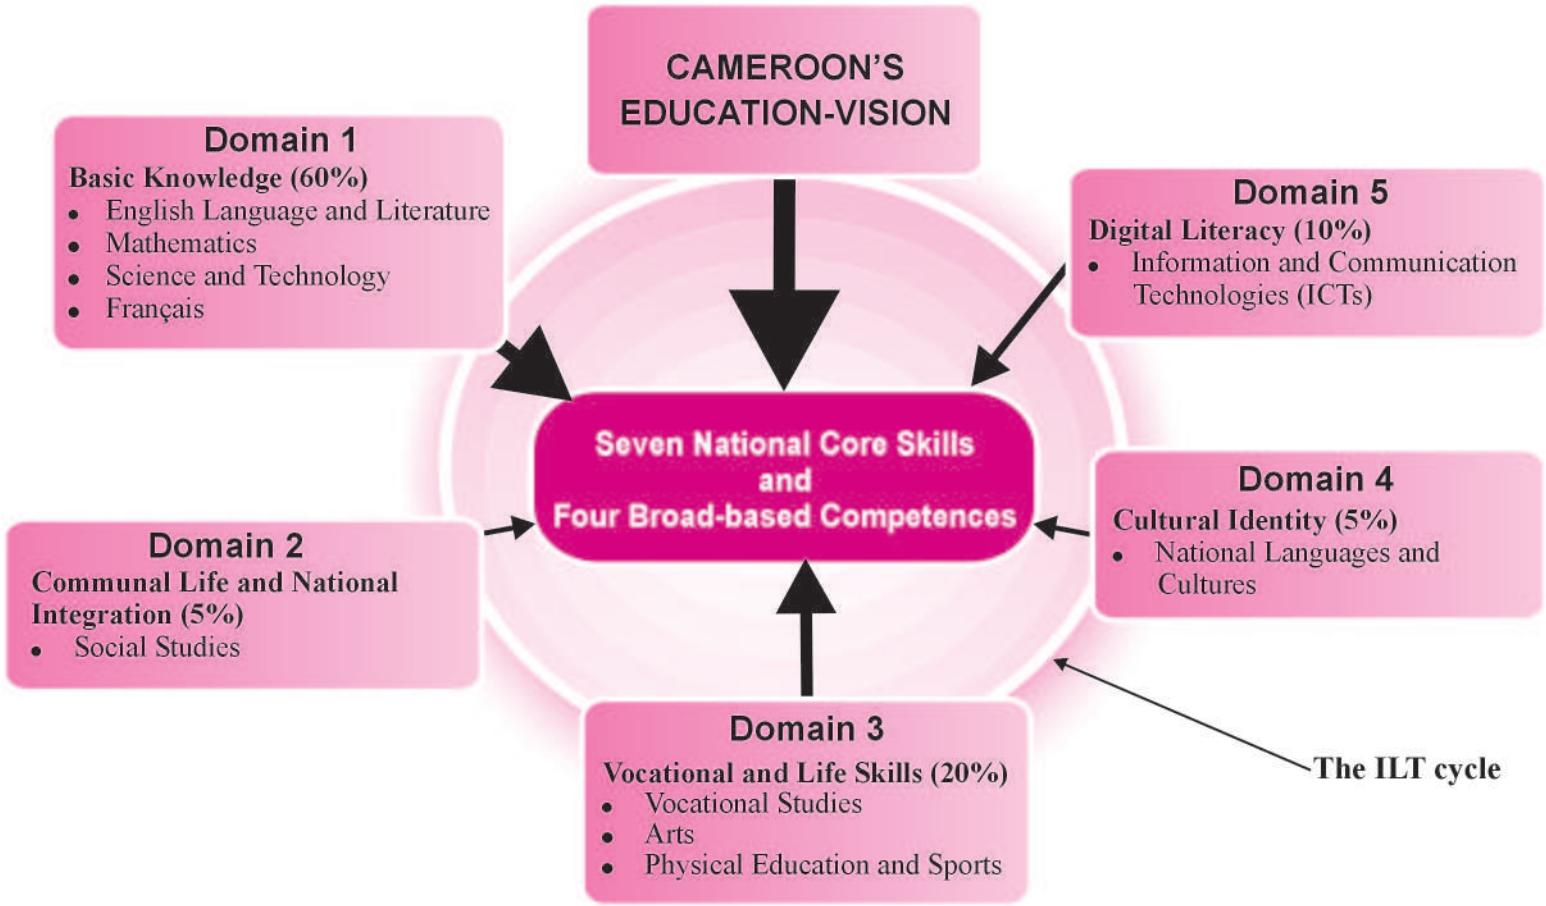

Figure 1: Link between the Learning Domains and the National Core Skills/Broad-based Competences

Plan of Action for the Teaching-Learning Cycle

The following steps will enable the teacher to put his/her plan into action:

1. Identify learning outcomes in function of the national core skills and as stated in the integrated monthly schemes of work.
2. Based on the integrated learning theme of the month, identify a project and plan the activities that will lead to its realization.
3. The different activities are planned chronologically (entry behaviour, simple to complex) in relation to the contents and contextualized through the ILT.
4. Monitor the realization of the project and ensure that all learners carry out their tasks.
5. Organize culmination events, that is, presentation of projects and assessment every last Thursday and Friday of the four weeks. Depending on the level, the presentations and assessment should cover three forms: oral, written and practice. A checklist should be prepared depending on the stated learning outcomes in order to record learners' progress in the class broadsheet (this will constitute a gradual building of the information for pupils' report cards which are filled every term).
6. Carry out remediation activities where necessary.
7. Do an auto-evaluation of the process. Note should be taken that this is a cyclical process within each teacher's community of practice (the school).

Figure 2 illustrates the cyclical teaching and learning process.

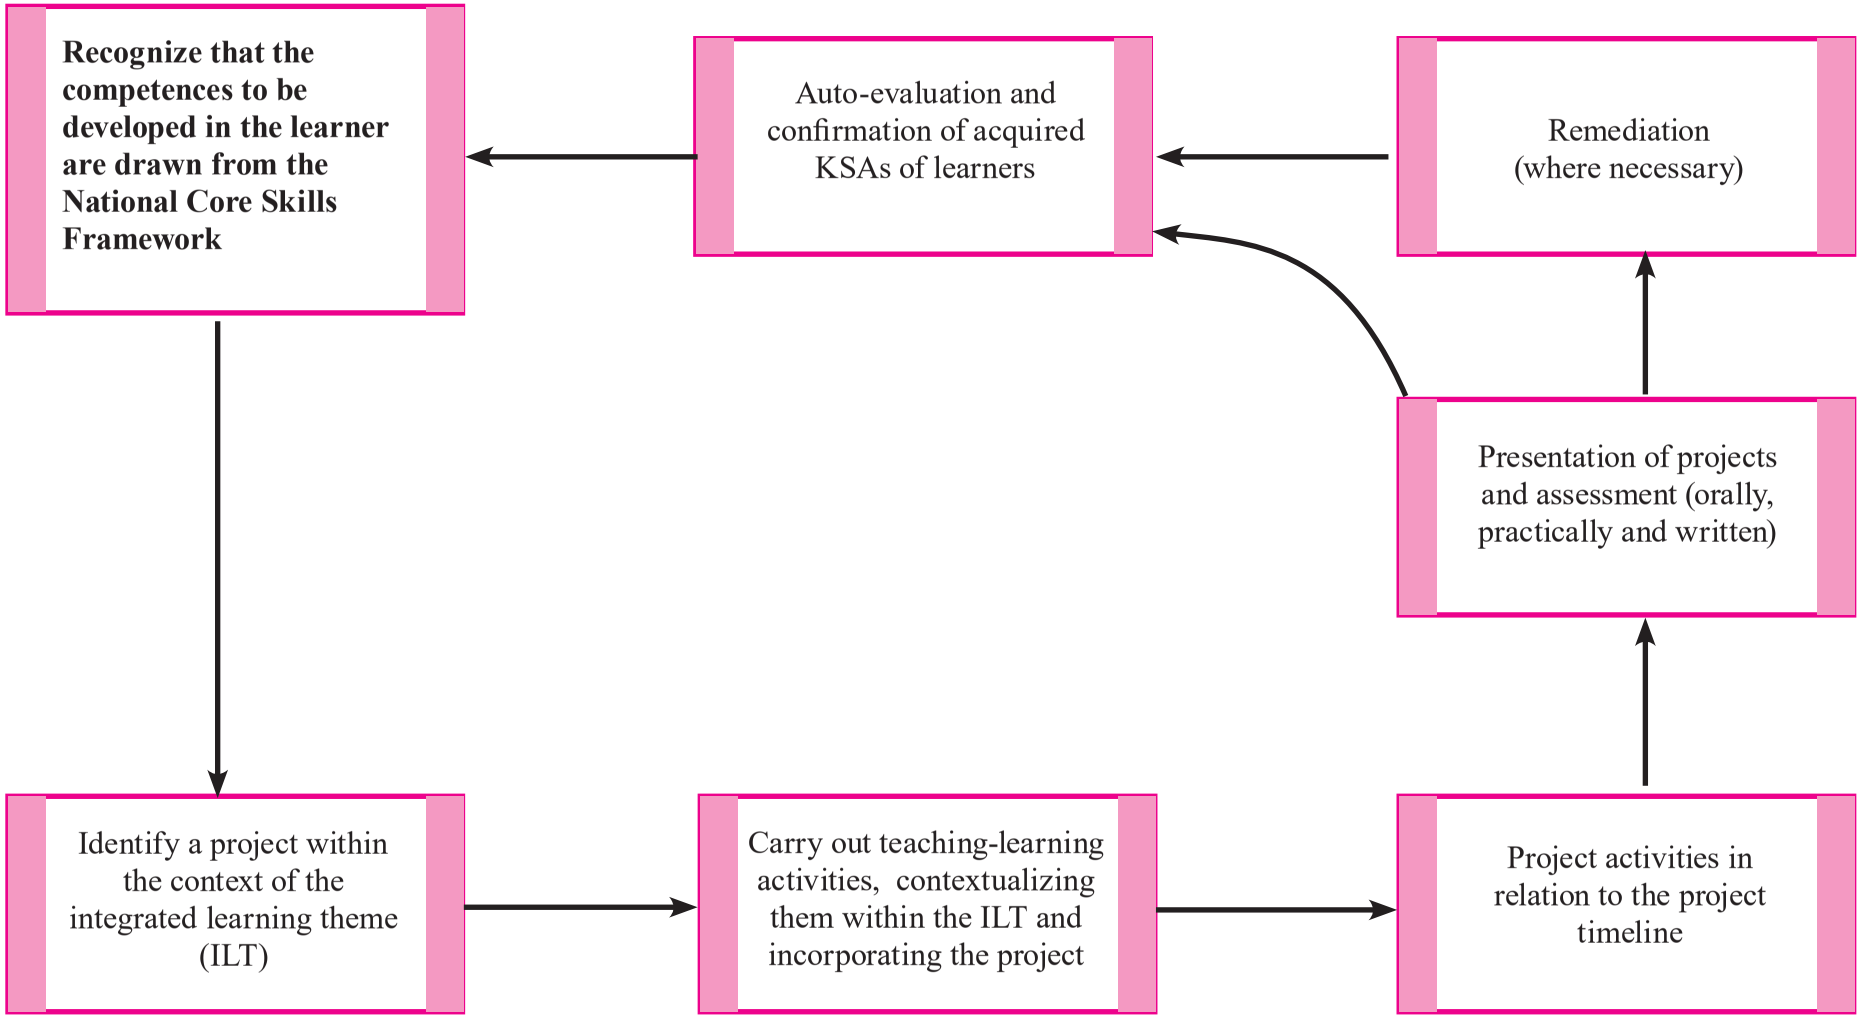

Figure 2: Cyclical Teaching and Learning Process

PART TWO
DEFINITION OF DOMAINS AND THEIR RELATED CARRIER SUBJECTS

Part two presents the five domains and their related carrier subjects. Each of these subjects is briefly defined while highlighting the national core skills that each develops, followed by a visual presentation of the subject, its components, terminal learning outcomes, and suggested evaluation criteria.

Domain 1: Basic Knowledge

This domain is fundamental to the development of all other domains. It nurtures and advances literacy and numeracy skills which are the pillars for a strong foundation in education and vital for living in the 21st century. As the name implies, basic knowledge is intended to create the base and a solid foundation for all other learning. There is no gainsaying that the ability to read and to work with numbers are prerequisites for the success of any educational system. Many studies carried out in Cameroon on learning achievements in the past couple of years show that there is a dwindling effect in literacy and numeracy to the extent that children who leave primary schools in Cameroon today can barely read and/or write, talk less of manipulating numbers and figures confidently. It is in this light that, it became necessary to give more learning-teaching time to a domain that will properly develop learners' literacy and numeracy skills and hence enhance their performance in other learning domains. Consequently, a sixty percent learning-teaching time has been assigned to this domain. The domain is going to be powered by English Language and Literature, Mathematics, Science and Technology and *Français.*

English Language and Literature

English Language is one of the two official languages in Cameroon. It is the language of instruction for the English Subsystem of Education. A literature component has been added to this subject in Level II and Level III. While English Language enables learners to express themselves orally and in writing, Literature enhances the reading culture in them. The teaching of English will target the development of the listening, speaking, reading and writing skills with emphasis on grammar, vocabulary and pronunciation. Like all languages, English is rule-governed, thus the **systematic functional teaching of grammar is strongly recommended**. This will enable learners use the language effectively.

This subject has been developed from domains that were derived from the following national core skills:

- Communication in the two official languages (English and French) and the use of at least one national language
- Practice of lifelong learning and the four broad-based competences

The components of the subjects are presented in figure 3.

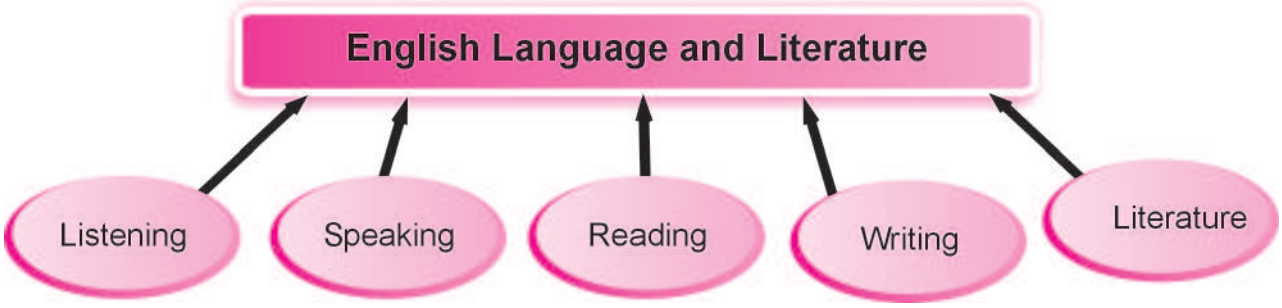

Figure 3: Components of English Language and Literature

Terminal Learning Outcomes

At the end of this level, learners will be able to:

- listen attentively for information in a given context
- interpret information and react appropriately
- communicate to express feelings, ideas and thoughts
- read texts fluently in a given context
- write texts legibly and coherently to express feelings, ideas and thoughts
- show great interest in communicating in English

Evaluation Criteria

The terminal learning outcomes at the end of Level III and the accompanying evaluation criteria are illustrated in table 7.

Table 7: Terminal Learning Outcomes and Evaluation Criteria

Skill	Terminal Learning Outcomes	Evaluation Criteria
Listening and Speaking	• Listen attentively for information in a given context • Interpret information and react appropriately • Communicate to express feelings, ideas and thoughts	• Fluency in speaking • Audibility in speech • Sustainance of attention • Willingness to take turns in speaking • Use of appropriate tones in speech
Reading	• Read texts fluently in a given context	• Fluency and audibility in reading • Respect of voice pitch • Correctness of answers to comprehension questions • Respect of instructions
Writing	• Write texts legibly and coherently to express feelings, ideas and thoughts	• Legibility, meaning, coherence, the right posture, right direction, respect of instructions

Mathematics

Mathematics develops the learner's creativity, initiative and problem-solving skills. It equally develops logical and inferential thinking, the ability to deduce and visualize in space and time. Through mathematics, the learner improves his/her knowledge of science, technology, agriculture and engineering. It is also necessary for financial literacy and relevant to most forms of employment. Mastering Mathematics entails the acquisition of knowledge, skills and attitudes as well as problem solving skills related to the different integrated learning themes. Primary School learners need these in computation, logical thinking and problem solving to construct knowledge and understand the world around them. The Mathematics syllabus also guides teachers, educators and examiners to prepare for teaching and learning as well as for formative and summative assessment. In this curriculum, five components of Mathematics have been developed, namely: Sets and Logic, Numbers and Operations, Measurement and Size, Geometry and Space, and Statistics and Graphs.

This subject has been developed from domains that were derived from the following national core skills.

- Use of basic notions in Mathematics, Science and Technology
- Practice of lifelong learning and the four broad-based competences

The components of the subject are presented in figure 4.

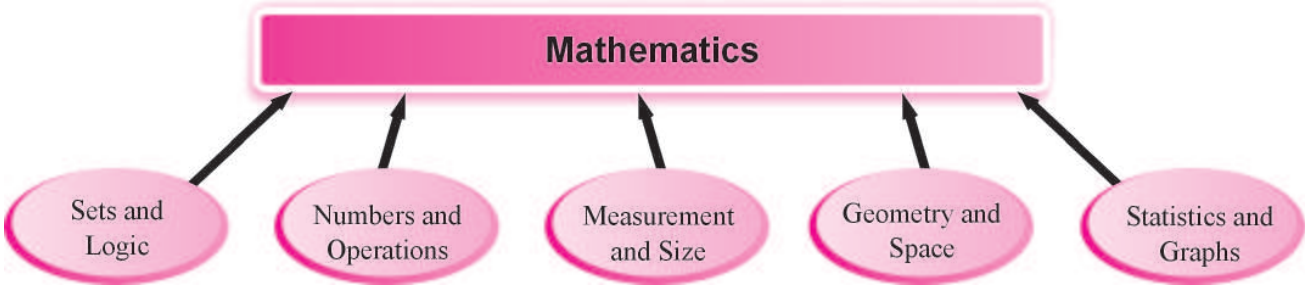

Figure 4: Components of Mathematics

Terminal Learning Outcomes

After the teaching-learning experiences in mathematics, learners will be able to:

- solve problems involving sets and logic
- solve problems involving number operations
- solve problems involving measurement units
- construct different geometric shapes
- categorize statistics on graphs
- use mathematical skills in daily life
- show interest in mathematics

Evaluation Criteria

The terminal learning outcomes and the evaluation criteria are illustrated in table 8.

Table 8: Terminal learning outcomes and evaluation criteria

Terminal Learning Outcomes	Evaluation Criteria
- Solve problems involving sets and logic - Solve problems involving number operations - Solve problems involving measurement units - Construct different geometric shapes - Categorize statistics on graphs - Use mathematical skills in daily life - Show interest in mathematics	- Group, match and classify objects and numbers in sets using different attributes - Correct representation of sets, symbols and figures - Correct use of symbols, signs and diagrams - Ordering and consistency - Identifying and building geometric shapes - Manupulating statistical information on groups - Appropriate use of operations and formulae - Associating quantities to figures and symbols - Proper use of mathematics tools - Solve meaningful daily life problems

Science and Technology

Science and Technology is penetrating every aspect of societal life and therefore has become an important component in the learning-teaching programmes at every level of education. It enables learners to understand themselves and their environment as well as adapt to the ever changing world in which they live. The teaching of Science and Technology develops the spirit of curiosity, creativity and innovation. Through Science and Technology, learners will be able to predict and analyse causes and effects of phenomena and use scientific approaches to solve emerging problems. These skills will be developed in Health Education, Environmental Science as well as in Technology and Engineering.

This subject has been developed from domains that were derived from the following national core skills:

- Use of basic notions in Mathematics, Science and Technology
- Demonstration of the spirit of autonomy, a sense of initiative, creativity, and innovation
- Practice of lifelong learning and the four broad-based competences

The components of the subject are illustrated in figure 5.

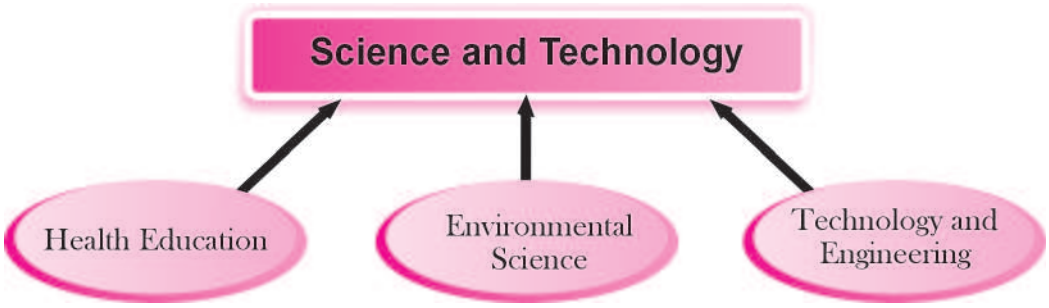

Figure 5: Components of Science and Technology

Terminal Learning Outcomes

At the end of this level, learners will be able to:

- demonstrate knowledge of their body
- demonstrate the capacity to care for their body
- respect scientific procedures and norms
- exhibit the capacity to protect and conserve wild life
- provide scientific explanations and solutions to natural phenomena
- propose scientific explanations and solutions to problems
- produce mini technological products/models
- show interest in furthering studies in science, technology and engineering

Evaluation Criteria

The terminal learning outcomes and evaluation criteria are illustrated in table 9.

Table 9: Terminal Learning Outcomes and the Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Demonstrate knowledge of their body - Demonstrate the capacity to care for their body - Respect scientific procedures and norms - Exhibit the capacity to protect and conserve wild life - Provide scientific explanations and solutions to natural phenomena - Propose scientific explanations and solutions to problems - Produce mini technological products/models - Show interest in furthering studies in science, technology and engineering	- Ability to name parts of the body - Ability to demonstrate how the different parts of the body are cared for - Be able to list bathings and clothings - Respect of procedures in experiments - Exactitude of experiment results - Improvisation of materials in experiments - Positive observable change in behaviour - Dexterity (careful handling and manipulation of objects) - Correct interpretation of phenomena/results

Français

Le français est l'une des deux langues officielles du Cameroun. Il est la deuxième langue officielle dans le sous-système anglophone. Il permet aux apprenants de communiquer oralement et par écrit dans des situations de la vie quotidienne pour un vivre-ensemble harmonieux et de s'ouvrir au monde francophone. L'acquisition du *Français* se fait à travers le développement des cinq (5) compétences de base, à savoir **la compréhension orale**, **l'expression orale** en continu, l'expression orale en interaction, **la compréhension écrite** (lecture) et **la production écrite**. Le développement de ces compétences se fait à travers les sous-disciplines suivantes: Compréhension et expression orale (en continu et en interaction), compréhension écrite (lecture), production d'écrits, grammaire, vocabulaire, conjugaison et orthographe. Il s'agit d'acquérir une véritable compétence de communication langagière qui englobe une composante pragmatique (acte de langage), linguistique (grammaire) et sociolinguistique et socio-culturel.

Il est à noter que l'enseignement de la grammaire, du vocabulaire, de la conjugaison et de l'orthographe est fait en contexte et lors du développement des compétences de base. Ces compétences se développent autour des centres d'intérêt suivants: la maison, la ville/village, l'école, les métiers, les voyages, la santé, sports et loisirs, dans l'espace.

Cette discipline a été développée à partir des domaines tirés des compétences clés suivantes.

- Communiquer dans les deux langues officielles (français et anglais) et pratiquer au moins une langue nationale
- Apprendre à apprendre tout au long de la vie et les quatre compétences transversales.

Les composantes de cette discipline sont présentées dans la figure 6.

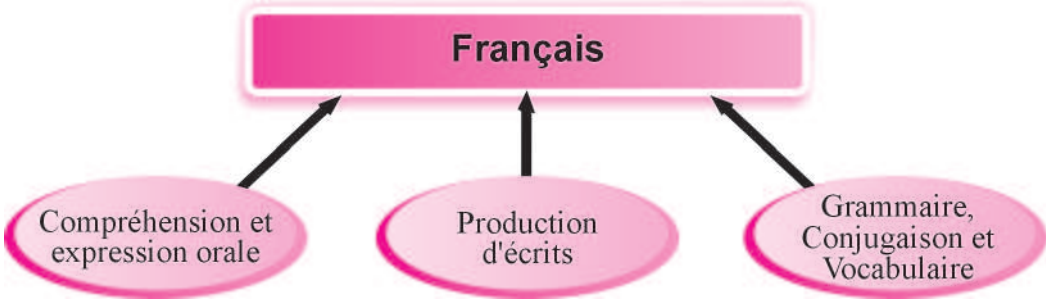

Figure 6: Les composantes du français

Tableau 10: Attentes de fin de niveau

Compétence	Attentes à la fin du niveau
Compréhension et expression orales	Écouter attentivement et s'exprimer de façon compréhensible avec la gestuelle appropriée.
Compréhension écrite (lecture)	Lire de courts textes simples en respectant la prononciation et l'intonation puis relever des informations.
Production d'écrits	Ecrire de petits textes d'une (01) à trois (03) phrases en rapport avec des situations de la vie quotidienne.

Critères d'évaluation

Les attentes du niveau et les critères d'évaluation du français au niveau 3 sont présentés dans le tableau 11.

Tableau 11: Les attentes à la fin du niveau et les critères d'évaluation

Attentes à la fin du niveau	Critères d'évaluation
Écouter attentivement et s'exprimer de façon compréhensible avec la gestuelle appropriée.	- Production correcte et cohérente; - Adéquation de la production à la situation; - Respect des règles grammaticales.
Lire de courts textes simples en respectant la prononciation et l'intonation puis relever des informations.	- Déchiffrage/décodage des sons, mots et phrases informations pertinentes; - Respect de la prononciation de l'intonation et la prononciation.
Ecrire de petits textes d'une (01) à trois (03) phrases en rapport avec des situations de la vie quotidienne.	- Adéquation du texte à la situation; - Correction des énoncés; - Cohérence de la production.

Domain 2: Communal Life and National Integration

Communal life and national integration refers to the notion of national unity, national integration and living together. It transcends the peculiarity of all kinds of geographical, historical, linguistic, cultural, religious and political entities. Communal life is the feeling of belonging to a particular community and national integration brings people of various communities together. In essence, communal life and national integration brings about self-love, love for others and respect for the common good. The human person is a social being, hence must live with other human beings irrespective of race, religion, socio-economic status etc. Children socialise more than adults and there is need to consolidate this value in them. This domain is powered by Social Studies (history, geography and citizenship). Only the citizenship component will be taught in Level One and all three components taught in Level Two and Level Three.

Social Studies

Social studies is the study of political, economic, cultural and environmental aspects of society in the past, present and future. It is intended to enable human beings to understand, preserve and transform the environment for their wellbeing and for the welfare of the community. This involves inculcating in learners patriotic, moral and citizenship values as well as good governance qualities in order to prepare them for a harmonious insertion into the society.

This subject has been developed from domains that were derived from the following national core skills:

- Practice of social and citizenship values (morality, good governance and budgetary transparency)
- Practice of lifelong learning and the four broad-based competences

The components of the subject are presented in figure 7.

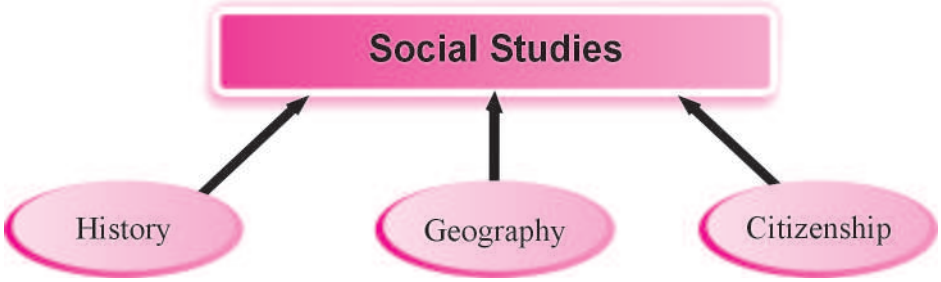

Figure 7: Components of Social Studies

Terminal Learning Outcomes

At the end of this level, learners will be able to:

- identify the effects of human activities
- relate human activities to development
- display a spirit of objectivity, tolerance, and patriotism
- practise values of harmonious living
- show love for nation and for the outside world
- respect differences in choices and personality
- practise behaviour which will lead to the protection and security of people and national property.

Evaluation Criteria

The terminal learning outcomes and evaluation criteria are illustrated in table 12.

Table 12: Terminal learning outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Identify the effects of human activities - Relate human activities to development - Display a spirit of objectivity, tolerance, and patriotism - Practise values of harmonious living - Show love for nation and for the outside world - Respect differences in choices and personality - Practise behaviour which will lead to the protection and security of people and national property	- Respect of national emblems - Practice of social values - Involvement in awareness campaigns - Logical explanations of events - Positive change of attitude - Ability to inteprete the effects of human activities on the environment - Ability to identify human activities that bring about development

Domain 3: Vocational and Life Skills

This domain prepares the learner for the social and professional realities that they would face in life. It provides them with opportunities to showcase talents and skills resulting in their integral development. It equips them with the capacity to adapt to and transform their environments. This is done by providing relevant and contextual technical and vocational training starters. In the context of limited work opportunities, it is necessary to start orientating children to creative enterprise in early education. In this way, a generation of people fully equipped to offer meaningful employment for themselves and at the same time, possess skills required for full participation in everyday life will be trained. Vocational studies and life skills is geared towards opening up learners' minds, a ready option for taking up technical education studies in secondary school. This domain equally encourages children who, after primary education, might not be able to go to secondary school, to learn a trade in order to earn a living. Either way, in order to survive in world economies today, every citizen from all strata of life needs vocational and life skills. The domain will be developed through three main subjects namely: Vocational Studies, Arts, and Physical Education and Sports (PES).

Vocational Studies

Vocational Studies is a practical subject, which provides learners with the opportunity to develop talents, initiative and creativity thereby enhancing their holistic development. It develops learners' autonomy, self-esteem and the spirit of entrepreneurship for subsequent self-reliance towards a responsible and balanced life without any constraints on their ambitions for further education. Vocational Studies is taught through Arts and Crafts, Agro Pastoral Farming and Home Economics. Only Arts and Crafts and Agro-pastoral Farming will be taught in level one.

Arts and Crafts: Activities in this component will enable learners to acquire techniques to fabricate objects using natural and recycled materials from their environment.

Agro Pastoral Farming: This activity will initiate learners into agricultural techniques and animal farming.

Home Economics: This activity will help learners develop interest in house management such as laundry, house craft, food and nutrition, needle work and mother craft.

This subject has been developed from domains that were derived from the following national core skills:

- Demonstration of the spirit of autonomy, sense of initiative, creativity and entrepreneurship
- Practice of lifelong learning and the four broad-based competences

The components of the subject are presented in figure 8.

Figure 8: Components of Vocational Studies

Terminal Learning Outcomes

At the end of this level, learners will be able to:

- use equipment to produce objects following a spelt out procedure
- acquire knowledge, skills and attitudes for productive work at home and effective home management
- acquire knowledge, skills and attitudes to manipulate local materials through given processes and procedures to produce objects
- produce art objects using local materials
- demonstrate a spirit of collaboration
- manifest high self-esteem, interest, initiative, creativity, resourcefulness and good value judgment

Evaluation Criteria

The terminal learning outcomes and evaluation criteria are presented in table 13.

Table 13: Terminal Learning Outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Use equipment to produce objects following a spelt out procedure - Acquire knowledge, skills and attitudes for productive work at home and effective home management - Acquire knowledge, skills and attitudes to manipulate local materials through given processes and procedures to produce objects - Produce art objects using local materials - Demonstrate a spirit of collaboration - Manifest high self-esteem, interest, initiative, creativity, resourcefulness and good value judgment	- Quality of material used - Respect of instructions - Quality of final product - Consistency in the explanatory note - Time used to carry out the task - Involvement in team work

Arts

Arts fosters the learner's imagination, critical thinking skills, problem-solving, creativity and aesthetic skills. Arts contents should engage, inspire and challenge learners, equipping them with knowledge and skills that can enable them create their own artistic designs. Through this subject, the learner acquires the spirit of open-mindedness and cultivates the attitude to appreciate beauty and develop his/her capacity for concentration, self-esteem, sense of sharing, assiduity, team spirit and patriotism. As learners progress, they should be able to think critically and develop a more rigorous understanding of arts. This subject aims at ensuring that all learners produce creative works, explore their ideas and record their experiences, thus becoming efficient in drawing, painting and other art and design techniques.

This subject has been developed from domains that were derived from the following national core skills:

- Practice of physical, sports and artistic activities

- Demonstration of the spirit of autonomy, a sense of initiative, creativity and entrepreneurship
- Practice of lifelong learning and the four broad-based competences

It is taught through the following components: visual arts and performing arts.

The components of the subject are presented in figure 9.

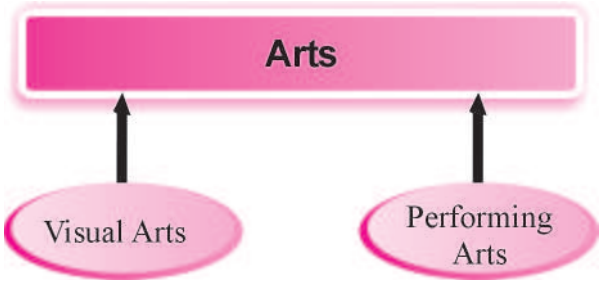

Figure 9: Components of Arts

Terminal Learning Outcomes

At the end of this level, the learner will be able to:

- create arts objects
- draw imaginative and créative literary images expressing feelings and emotions
- use voice, body and/or inanimate objects to convey feelings and emotions
- manifest moral rectitude and appropriate life styles

Evaluation Criteria

The Terminal Learning Outcomes and evaluation criteria are presented in table 14.

Table 14: Terminal Learning Outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Create arts objects - Draw imaginative and creative literary works expressing feelings and emotions - Use voice, body and/or inanimate objects conveying feelings and emotions - Manifest moral rectitude and appropriate life styles	• Compliance with guidelines and techniques (correct use of geometric shapes and colours • Ability to write imaginatively, creatively expressing original thoughts • Ability to create and sing a song • Synchronization between voice variations and percussion. • Ability to convey feelings and thoughts through music • Mastery of the stage and respect for the text • Ability to act a role freely • Ability to recognize and use appropriate costumes, make-up and hairstyles • Ability to create and execute dance techniques • Decent looks, behaviour, and lifestyle

Physical Education and Sports

Physical Education and Sports is a set of physical activities that contributes to the physical, moral health and social development of the learner. It promotes a harmonious construction of the body and makes the learner fit to perform individual and collective tasks. It is through physical and sporting activities that the child's brain internalizes the foundations of laterality (left/right), directionality (up, down, in, out) and position in space (over, under, behind). These are concepts that are important to the learner's mathematical thinking, vocabulary development, reading and writing skills. Physical Education and Sports remains an effective educational tool as it develops learners' mental capacities through body fitness activities.

This subject has been developed from a domain that was derived from the following national core skills:

- Practice of physical, sports and artistic activities
- Practice of lifelong learning and the four broad-based competences

The components of the subject are presented in figure 10.

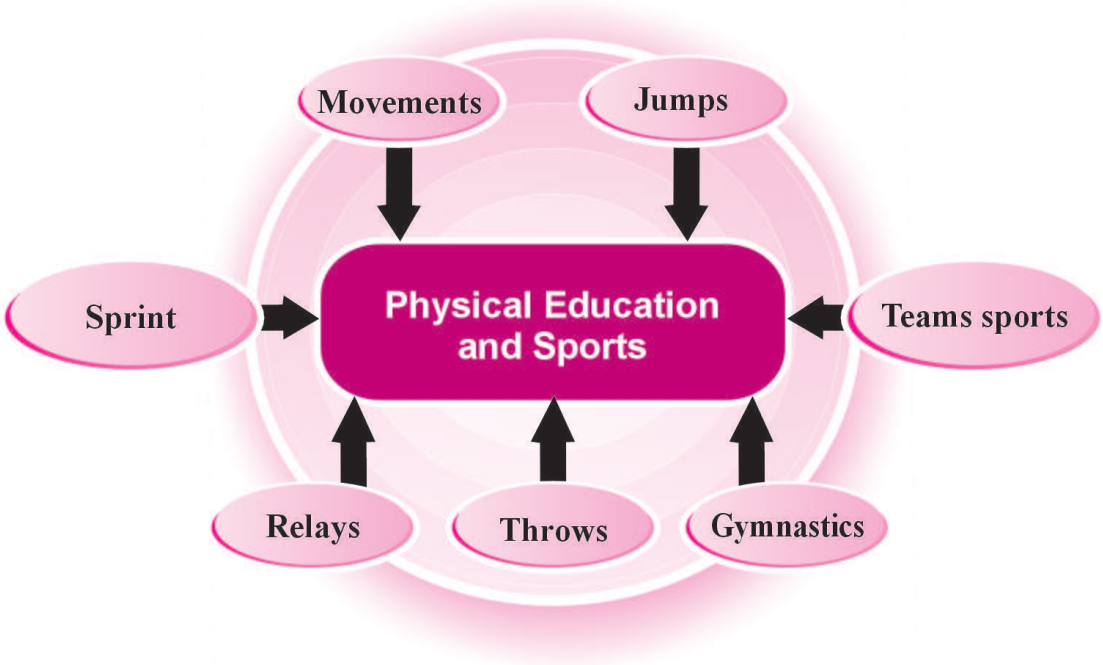

Figure 10: Components of Physical Education and Sports (PES)

Terminal Learning Outcomes

Physical Education and Sports enables the learners to:

- discover his/her body
- practise social and interpersonal communication skills
- stimulate his/her physical, intellectual and emotional growth
- maintain a healthy body

Evaluation criteria

The terminal learning outcomes and evaluation criteria are presented in table 15.

Table 15: Terminal Learning Outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Discover his/her body - Practise social and interpersonal communication skills - Stimulate their physical, affective, intellectual and emotional growth - Maintain a healthy body	- Alertness, vigilance, posture - Accuracy, respect of rules, fanfare, collaboration - Respect of signals, endurance - Identify parts of the body and their roles - Ability to carry out routine activities effectively

Domain 4: Cultural Identity

Cultural identity is a sense of belonging to a group or a nation with distinct ways of doing things. This is characterised by language, tradition and religion. Cultural identity is, in summary, a set of traits (customs) that characterises a people and differentiates them from other people. The case of Cameroon is visibly unique because of her multicultural nature. This domain is developed via National Languages and Cultures.

National Languages and Cultures

National Languages and Cultures constitutes the acquisition of knowledge, skills and attitudes (values) that enable learners to speak their national language and be rooted in their cultures, hence building up self-esteem and confidence. National Languages and Cultures refers to all languages and cultures in the four major linguistic and cultural zones of Cameroon. This subject includes social practices, modes of life, arts and crafts as well as architectural designs and literary expressions that bring out a people's identity. It helps learners to open up to learning and to be better educated.

Learning National Languages is advantageous especially at this time when it is established worldwide that learning should start in the mother tongue of the learner.

This subject has been developed from domains that were derived from the following national core skills:

- Communication in the two official languages (English and French) and the use of at least one national language
- Practice of social and citizenship values (morality, good governance and budgetary transparency)
- Practice of lifelong learning and the four broad-based competences

The components of the subject are presented in figure 11.

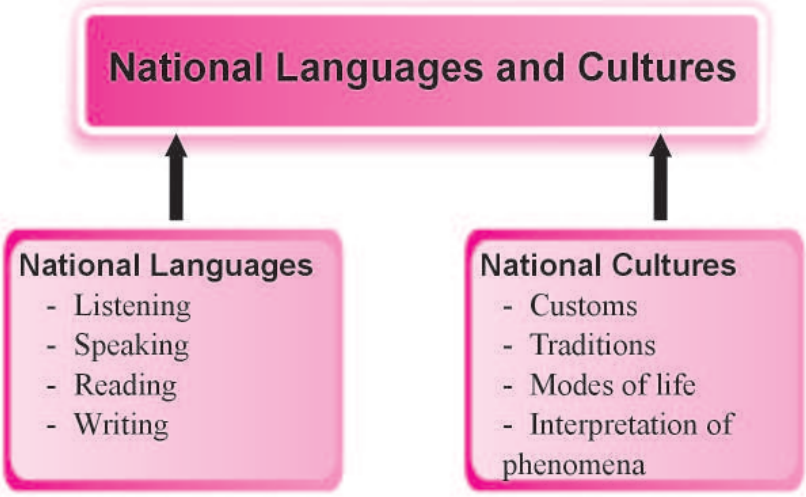

Figure 11: Components of National Languages and Cultures

Terminal Learning Objectives

After learning National Languages and Cultures, the learners will be able to:

- Communicate appropriately using at least five sentences in any given context
- Sing traditional songs fluently
- Perform cultural activities/scenes
- Listen attentively without interrupting the speaker
- Read at least five sentences and bring out the meaning in a related theme
- Write correct and coherent sentences to pass across information

Evaluation Criteria

The terminal learning outcomes and evaluation criteria of National Languages and Cultures are presented in table 16.

Table 16: Terminal Learning Outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Communicate appropriately using at least five sentences in any given context - Sing traditional songs fluently - Perform cultural activities/scenes - Listen attentively without interrupting the speaker - Read at least five sentences and bring out the meaning in a related theme - Write correct and coherent sentences to pass across information in any given context	- Respect of rules related to the spoken languages - Audibility, fluency, articulation, intonation in speech - Sustainance of dialogue and animation - Correctness of responses /correctness of gestures/ actions - Correctness of form, coherence and neatness in writing - Respect of rhythm and dance steps - Observance of interactions with others and participation in projects.

Domain 5: Digital Literacy

Digital literacy underscores the cultural changes produced by the development and transmission of Information and Communication Technologies (ICTs). The achievement of Cameroon's 2035 Vision will also depend on the country's potentials to be transformed into an information-based or knowledge-based society in which information processing, knowledge management and creation are essential features that guarantee success. The 21st century is considered as the information era and learners are expected to use ICTs to access valuable and updated resources in order to break the digital divide. Digital literacy does not only refer to computers but has evolved to include telephones, iPad, the internet and all forms of social media. With rapid growth in the number of parents buying digital devices for their children and not being able to control what the children do with these devices, it is important that education takes over its responsibilities. This domain aims at empowering learners with technological skills for present and future actions and it is developed through ICTs.

Information and Communication Technologies (ICTs)

The use of Information and Communication Technologies is an integral part of modern society. Information is regarded as a valuable asset for all individuals. The ability to construct knowledge from the information gathered is, by and large, seen as a vital survival skill in today's society. ICTs will be most relevant and meaningful for pupils if they are used in relation to their immediate environment. Although ICT is universal, it is only by contextualization and application that pupils understand and appreciate its use. Where learning materials can only give general examples, it is recommended that the teacher uses local examples instead. ICT has the potential to stimulate pupils to engage in, enjoy and love learning. Before teaching a specific ICT skill, teachers are encouraged to introduce a specific task to be performed while applying the new skill learnt. Tasks chosen should relate to subjects in the curriculum such as Mathematics, English, Science and Technology.

This subject has been developed from domains that were derived from the following national core skills:

- Use of basic information and communication technology concepts and tools
- Practice of lifelong learning and the four broad-based competences

The components of the subject are illustrated in figure 12.

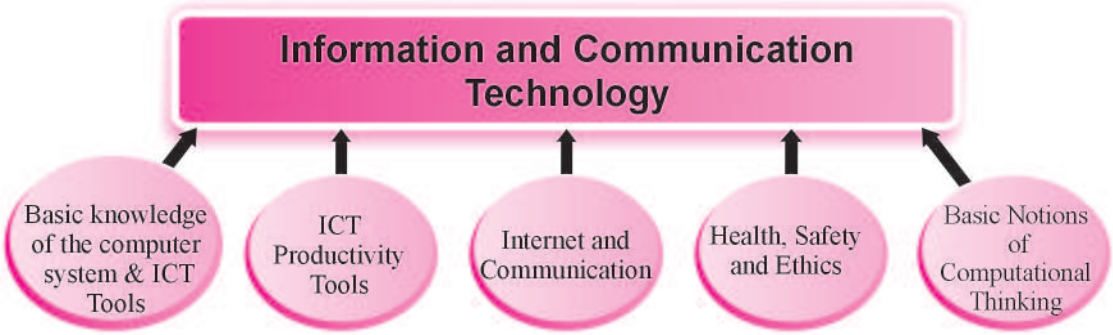

Figure 12: Components of Information and Communication Technology

Terminal Learning Outcomes

At the end of this level, the learners will be able to:

- use computer equipment and ICT tools
- perform basic word processing
- produce basic spreadsheets
- apply basic health and safety measures when using computers and other ICT devices
- practise basic computational thinking
- use ICTs responsibly

Evaluation Criteria

The terminal learning outcomes and evaluation criteria are illustrated in table 17.

Table 17: Terminal Learning Outcomes and Evaluation Criteria

Terminal Learning Outcomes	Evaluation Criteria
- Use computer equipment and ICT tools - Perform basic word processing - Produce basic Spreadsheet - Apply basic health and safety measures when using computers and other ICT devices - Practise basic computational thinking - Use ICTs responsibly	- Ability to identify ICT tools and their parts - Correct use of ICT tools - Ability to use the key board - Use productivity software - Respect of health, hygiene and safety rules while manipulating ICT tools - Ability to explain computational concepts using real life situations

PART THREE
CONTENTS OF THE SYLLABUS

Details of the contents of the ten subjects, the expected learning outcomes, the suggested teaching/learning strategies and the didactic materials for each subject area are presented in the tables that follow. Note should be taken that all the monthly teaching/learning activities are anchored on the integrated learning theme of that month. As a reminder, the integrated learning themes of the primary school cycle are laid out in table 18 and table 19.

Table18: Integrated Learning Themes for Level I and Level II (Classes 1/2/3/4)

No	Integrated Learning Theme
1	The home
2	The village/town
3	The school
4	Occupations
5	Travelling
6	Health
7	Games
8	Communication

Contents of English Language and Literature

Table 20: English Language and Literature contents, expected learning outcomes, suggested methodology and didactic materials

Listening and Speaking					
CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units and Contents	**Expected Learning Outcomes**	**Units and Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Sounds - Homophones - Minimal pairs - Thriphthongs - Consonant clusters - Popular rhymes	- Discriminate between the different types of sounds - Show interest in spelling and pronunciation	**Sound recognition** - Tongue twisters; - Homophones; - Minimal pairs - Thriphthongs - Consonant clusters - Popular rhymes	- Discriminate between the different types of sounds - Show interest in spelling and pronunciation	- Drilling - Illustrations - Demonstrations - Questions and answers - Cooperative learning	- Realia, drawings, picture, flashcards - Recorded contents - Wordlist, related textbooks, tongue twisters - Language games/ puzzles
Tenses -Simple present -Simple Past -Future	- Construct sentences in the simple present and past tense - Show willingness to use the simple present, simple past and future tenses	**Tenses** - Present perfect - Past perfect - Future perfect - Present future continuous	- Express accomplished and ongoing activities in the present, past and future tenses - Show willingness to use the perfect and continuous tenses	- Drilling - Illustrations - Demonstrations	- Realia, drawings, picture, flashcards - Recorded contents - Wordlist, related textbooks, tongue twisters
Polite language - Polite requests May I … Could I … - Polite responses It's a pleasure	- Use polite expressions - Listen attentively - Speak in turns using the right intonation - Show willingness to use polite language	**Polite language** -Polite requests Please… Kindly … -Polite responses You're welcome I am okay.	- Use polite requests - Respond politely to people - Listen attentively - Speak in turns using the right intonation - Show willingness to use polite language	- Explanations - Illustrations - Demonstrations - Questions and answers - Dialogue	- Drawings, picture, flashcards - Recorded contents - Wordlist, related textbooks
Greetings Hello Good morning/ afternoon/evening	- Greet appropriately in the different periods of the day - Display enthusiasm to greet	**Introducing self and others** Here is... S/he is ... Meet my...	- Introduce self and others correctly - Use appropriate vocabulary to introduce self	- Illustrations - Demonstrations - Questions and answers - Dialogue	- Name cards, drawings, picture, flashcards - Recorded contents - Wordlist, related textbooks

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Phenomena - The weather - The period of the day	- Describe the weather - Say the period of the day - Talk about various phenomena	**Phenomena** - Natural phenomena e.g. weather, decomposition, disasters - Social phenomena e.g. competitions, conflicts, marraige	- Describe the weather - Say the period of the day - Show the willingness to talk about phenomena	- Illustrations - Demonstration - Explanations - Questions and answers	- Realia - Drawings/pictures - Flashcards - Wordlist _ Related textbooks
Listening comprehension - Texts - Speeches - Radio slots - Television slots - Telephone calls	- Respond accurately to related tasks - Carry out a telephone conversation - Show a sustained interest in listening	**Listening comprehension** - Texts - Speeches - Radio slots - Television slots - Telephone calls	- Respond accurately to related tasks - Carry out a telephone conversation - Show a sustained interest in listening	- Illustrations - Demonstration - Reading aloud - Questions and answers - Cooperative learning - Simulations	- Pictures, flashcards - Recorded contents - Wordlist - Related textbooks - Telephones/texts - Audio materials
- Discussion	- Express preferences - Respect one's turn in a discussion and listen when others are talking. - Show willingness to sustain a discussion	Discussion	- Discuss about different means of travelling - Respect one's turn in a discussion and listen when others are talking. - Show willingness to sustain a discussion	- Discussion - Questions and answers - Illustrations - Demonstrations - Cooperative learning	- Flashcards - Pictures, real objects, charts, drawings - Wword list and puzzles
Debate Means of communication	- Debate on different points of view convincingly - Show enthusiasm to defend one's point of view convincingly	**Debate** Stating preferences -I prefer to ... - It is better to ...	- Debate on different points of view convincingly - Show enthusiasm to defend one's point of view	- Cooperative learning - Questions and answers - Demonstrations	- Flashcards - Pictures, real objects, charts, drawings - Word list and puzzles

Reading					
CLASS 5		**CLASS 6**		**Suggested methodology and didactic materials**	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Reading Aloud - Stories and Songs - Poems - Speeches	- Read various texts fluently and audibly - Show willingness to read to others	**Reading Aloud** - Pictures - Stories - Songs - Poems - Short novels	- Interpret and appreciate pictures; - Read various texts fluently and audibly - Show willingness to read aloud	- Drilling - Group work - Explanations - Demonstrations - Questions and answers	- Newspaper articles - News, speeches - Magazines, cartoons - Word list - Short stories - Pictures
Reading Comprehension - Stories and Songs - Poems - Speeches - Short novels	- Read texts, discuss them and carry out related tasks - Show interest in reading for comprehension	**Reading Comprehension** - Stories - Poems - Speeches - Short novels	- Read texts, discuss them and carry out related tasks - Show interest in reading for comprehension	- Explanations - Questions and answers - Role play - Group work - Demonstrations	- Texts - Cartoons - Poems - Songs - Stories
Literature					
- Adventure stories - Short plays	- Read picture adventure stories with short texts - Put self in the position of a character in a story - Deduce a moral lesson from a story	- Adventure stories - Short plays	- Read picture adventure stories with short texts - Put self in the position of a character in a story - Deduce a moral lesson from a story	- Individual and collaborative work - Visits to libraries - Storytelling - Dramatisation - Cooperative learning	- Adventure story books - Short plays - Assorted costumes - Props

Writing					
CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Handwriting Upright joint script	- Copy short texts of at least seven different sentences several times legibly and consistently - Write out information in a beautiful and creative manner - Show interest in neat handwriting	**Handwriting** Upright joint script	- Copy short texts of at least seven different sentences several times legibly and consistently - Write out information in a beautiful and creative manner - Show interest in neat handwriting	- Group work - Explanations - Demonstrations - Individual work - Peer tutoring	- Charts - Mobile boards - Related books - Side board
Taking down notes	- Write down essential points of a presentation, speech, meeting discussions - Show willingness in taking down notes	Taking down notes	- Write down essential points of a presentation, speech, meeting discussions - Show willingness in taking down notes	- Explanations - Individual work - Reading aloud - Repetition	- Text - Speech - Meeting discussions - Presentation - Notepads
Numbers	- Write numbers in words from 1001 -5000 - Show willingness in writing numbers in words	**Numbers**	- Write numbers in words from 5,001 -10,000 - Show willingness in writing numbers in words	- Explanations - Individual work - Demonstrations - Questions and answers - Copying	- Number cards - Real objects - Audio-visual aids - Pictures/Charts
Letter writing - Formal letters - Informal letters	- Write formal and informal letters - Display interest in respecting the format of letter writing	**Letter writing** - Formal letter - Informal letter	- Write formal and informal letters - Display interest in respecting the format of letter writing	- Explanations - Individual work - Demonstrations - Questions and answers - Creative writing	- Formal letters - Informal letters - Envelops - Stamps - Notepads - Writing sheets

English Language and Literature contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Spelling and Dictation - Jumbled words - Sentences - Paragraph	- Build sentences from jumbled words - Write a dictated paragraph of at least 50 words - Show interest to spell words correctly	**Spelling and Dictation** - Jumbled words - Paragraph	- Build sentences from jumbled words - Write dictated sentences of at least 50 words - Show interest to spell words correctly	- Group work - Questions and answers - Drilling - Observations - Demonstrations	- Real objects, charts - Pictures and flashcards - Script - Word basket
Drama -A scene Eg. Buying and selling, consulting a doctor	- Write a short drama piece on a chosen scene - Display the enthusiasm to act	**Drama**	- Write a short drama piece on a chosen scene and direct it - Display the enthusiasm to act a short play	- Group work - Memorisation - Role play and dramatisation	- Real objects, charts - Pictures and flashcards - Scripts - Stage props and costumes
Composition - Narrative essay - Descriptive essay - Persuasive essay - Argumentative essay	- Explain the characteristics of the different types of essays - Write different types of essays of about 120 words - Display interest and creativity in essay writing	**Composition** - Descriptive essay - Narrative essay - Persuasive essay - Argumentative essay	- Explain the characteristics of the different types of essays - Write different types of essays of about 150 words - Display interest and creativity in essay writing	- Group work - Demonstrations - Process writing	- Real objects, charts - Pictures and flashcards - Model essays - Notepads - Dictionary

Grammar, Vocabulary and Pronunciation

To build a language, you need building materials that are called "Parts of Speech". They are eight in number, namely: **verbs, nouns, adjectives, adverbs, prepositions, pronouns, conjunctions and interjections.** Every word in English fits into at least one of these eight categories; the key to understanding and using the English language. As concerns vocabulary, learners will acquire new words and expressions naturally through listening, speaking, reading and writing activities. However, teachers are required to plan and systematically teach vocabulary and pronunciation in context.

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Verbs - Regular and irregular verbs - Helping verbs - Conjugation - Simple present, past and future tenses - Past, present and future perfect tenses - The conditional	- Distinguish between helping verbs, regular and irregular verbs - Use verbs in the different tenses - Appreciate present, past and future events	**Verbs** - Regular and irregular verbs - Helping verbs - Conjugation - Simple present, past and future tenses - Past, present and future perfect tenses - The conditional	- Distinguish between helping verbs, regular and irregular verbs - Use verbs in the different tenses - Appreciate present, past and future events	- Explanations - Team work - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Verb list and puzzles
Nouns - Kinds of nouns: common, proper, concrete, abstract, collective and compound - Plural formation - Uses of nouns: subject, object, complement - Articles (noun signals)	- Identify and use nouns appropriately - Use the plurals of countable and uncountable nouns - Identify the different uses of nouns in a sentence - Show interest in using all forms of nouns in association with the articles	**Nouns** - Kinds of nouns: common, proper, concrete, abstract, collective and compound - Plural formation - Uses of nouns: subject, object, complement.. *Articles (noun signals)	- Identify and use nouns appropriately - Use the plurals of countable and uncountable nouns - Identify the different uses of nouns in a sentence - Show interest in using all forms of nouns in association with the articles	- Explanations - Team work - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Noun list and puzzles - Dictionaries

English Language and Literature contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Adjectives - Kinds of adjectives - Common and proper adjectives - Comparative and superlative adjectives	- Identify and use common and proper adjectives appropriately - Use comparative and superlative adjectives - Show interest in using all forms of adjectives - Cherish being objective	**Adjectives** - Kinds of adjectives - Common and proper adjectives - Comparative and superlative adjectives	- Identify and use common and proper adjectives appropriately - Use comparative and superlative adjectives - Show interest in using all forms of adjectives - Cherish being objective	- Explanations - Team work - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Adjective list and puzzles
Adverbs - Manner - Place - Time - Function -modifying verbs -modifying adverbs	- Identify and use adverbs of manner, of place and of time in appropriate contexts - Use adverbs with verbs and with other adverbs in different contexts - Show interest in using adverbs correctly	**Adverbs** - Manner - Place - Time - Function -modifying verbs -modifying adverbs	- Identify and use adverbs of manner, of place and of time in appropriate contexts - Use adverbs with verbs and with other adverbs in different contexts - Show interest in using adverbs correctly	- Explanations - Team work - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Adverb list and puzzles
Prepositions - Location - Direction - Time - Relationship	- Identify and use prepositions of location, direction, time and relationship appropriately - Show interest in using prepositions in different contexts	**Prepositions** - Location - Direction - Time - Relationship	- Identify and use prepositions of location, direction, time and relationship appropriately - Show interest in using prepositions in different contexts	- Explanations - Teamwork - Demonstrations - Questions and answers - Mind mapping	- Flashcards - Real objects - Mind maps - Charts - Preposition list and puzzles

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Pronouns - Simple - Compound -Types -Subject pronouns -Object pronouns -Possessive pronouns - Reflexive pronouns - Reciprocal pronouns	- Identify and use simple, compound, subject and object pronouns - Use possessive, reflexive and reciprocal pronouns appropriately - Treasure the use of pronouns in different contexts	**Pronouns** - Simple - Compound -Types -Subject pronouns -Object pronouns -Possessive pronouns -Reflexive pronouns -Reciprocal pronouns	- Identify and use simple, compound, subject and object pronouns - Use possessive, reflexive and reciprocal pronouns appropriately - Treasure the use of pronouns in different contexts	- Explanations - Teamwork - Demonstrations - Questions and answers - Mind mapping	- Flashcards - Real objects - Mind maps - Charts - Pronoun list and puzzles
Conjunctions - Coordinating conjunctions - Subordinating conjunctions	- Link words, phrases and sentence with connecting words - Express desire to use conjunctions in appropriate contexts	Conjunctions - Coordinating conjunctions - Subordinating conjunctions	- Link words, phrases and sentence with connecting words - Express desire to use conjunctions in appropriate contexts	- Explanations - Teamwork - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Conjunction list and puzzles
Interjections - Greetings - Joy - Approval - Surprise - Grief	- Express strong feelings or emotions with short exclamatory word(s)	Interjections - Greetings - Joy - Approval - Surprise - Grief	- Express strong feelings or emotions with short exclamatory word(s)	- Explanations - Teamwork - Demonstrations - Questions and answers	- Flashcards - Real objects - Drawings - Charts - Interjection list and puzzles

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Vocabulary - Definition - Synonyms - Antonyms - Prefixes - Suffixes	- Use a variety of words related to the integrated learning themes and other contexts - Use the correct synonyms of words to communicate - Use the correct antonyms of words to express meaning - Use prefixes to form new words - Use suffixes to form new words	**Vocabulary** - Definition - Synonyms - Antonyms - Prefixes - Suffixes	- Use a variety of words related to the integrated learning themes and other contexts - Use the correct synonyms of words to communicate - Use the correct antonyms of words to express meaning - Use prefixes to form new words - Use suffixes to form new words	- Definitions - Explanations - Teamwork - Demonstrations - Questions and answers - Use of games	- Flashcards - Real objects - Drawings - Word list - List of prefixes and suffixes - Charts and puzzles - Dictionaries - Related textbooks
The sentence -Types (declarative, interrogative, exclamatory, imperative) - Main parts of the sentence - Simple sentence - Compound sentence - Complex sentence - Paragraph - Essays	- Construct various sentence types - Identify the main parts of a sentence, a paragraph and an essay - Show the desire to write correctly and in a creative manner	**The sentence** -Types (declarative, interrogative, exclamatory, imperative) - Main parts of the sentence - Simple sentence - Compound sentence - Complex sentence - Paragraph - Essays	- Construct various sentence types - Identify the main parts of a sentence, a paragraph and an essay - Show the desire to write correctly and in a creative manner	- Explanations - Teamwork - Demonstrations - Questions and answers - Creative writing	- Flashcards - Real objects - Drawings - Charts - List of different types of sentences and puzzles - Sample paragraphs and essays

CLASS 5		CLASS 6		Suggested methodology and didactic materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/ Learning Strategies**	**Didactic Materials**
Spelling, proununcia-tion and punctuation - Spelling rules - Punctuation marks - Punctuation rules - Capitalization rules - Dictionary work	- Spell, pronounce and punctuate correctly at all times - Use capital letters correctly - Apply spelling and punctuation rules in writing - Use a dictionary to look up for the meaning of words - Show the willingness to spell and use capitaliza-tion correctly	**Spelling, prounun-ciation and punc-tuation** - Spelling rules - Punctuation marks - Punctuation rules - Capitalization rules - Dictionary use	- Spell, pronounce and punctuate correctly at all times - Use capital letters cor-rectly - Apply spelling and punc-tuation rules in writing - Use a dictionary to look up for the meaning of words - Show the willingness to spell and use capitalization correctly	- Explanations - Teamwork - Demonstrations - Questions and an-swers - Spelling games - Dictionary work - Pronunciation drills	- Flashcards - Real objects - Jumbled words - Jumbled letters - Charts and puzzles - Dictionary - Tape recorders

Contents of Mathematics

Table 21: Mathematics contents, expected learning outcomes, suggested methodology and didactic materials

Sets and logic					
CLASS 5		**CLASS 6**		**Suggested Methodology and Didactic Materials**	
Units/Contents	**Expected Learning Outcomes**	**Units/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Material**
Types of sets - Finite/infinite - Universal - Subsets -Equal/equivalent -Disjoint sets -Intersection of sets - Venn diagrams	-Discriminate sets -Describe sets -Solve problems involving sets -Represent sets in Venn diagrams - Arrange belongings in an orderly and neat manner	**Types of sets** -Universal set -Subsets - Intersection of sets -Finite/Infinite sets -Equal/equivalent sets -Disjoint sets -Venn diagrams	- Solve problems involving sets - Describe various types of sets - Represent sets in venn diagrams - Arrange belongings in an orderly and neat manner	-Discovery method -Problem Solving method -Laboratory method -Cooperative learning -Individualized instruction - Task approach	-Real objects -Audio video tapes -Pictures -Charts -Recycled materials -Abacus
Numbers and operations					
Operations -Six digit numbers (0 - 100,000) -Mathematical operations -Simple interest, rate, time and principal -Direct and Inverse proportion -Number bases -Modulo arithmetic -Cumulative properties and law of addition and subtraction	- Read numbers - Write numbers in words - Make bonds - Solve problems using all mathematical operations - Build multiplication tables - Calculate simple interest, rates, time and principal - Solve problems based on proportions - Convert from one number base to another - Solve problems involving modulo arithmetic - Show interest in Mathematics	**Operations** -Seven-digit numbers (0 - 1,000,000) -Decimal numbers -Fractions -Mathematical operations -Simple interest, rate, time and principal -Direct, inverse and compound proportion -Number bases -Cumulative law of addition -Place value -Highest common factors (HCF)	-Read numbers -Write numbers in words -Set up bonds -Solve problems involving vulgar and decimal fractions -Use mathematical operations to solve real life problems -Cherish equitable distribution	- Discovery method - Guided inquiry - Problem solving method - Laboratory method - Cooperative learning - Individualized instruction	- Real objects - Audio video tapes - Pictures - Abacus - Recycled materials - Clock face - Maths set - Calculator

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Material**
- H C F of numbers up to 100,000 - Odd, even and prime numbers **Fractions and decimals** - Proper fractions - Mixed fractions - Improper fraction - BODMAS - Decimals and whole numbers	- Solve problems involving fractions - Convert mixed fractions to improper fractions - Convert improper fractions to mixed fractions - Solve problems involving decimals and whole numbers	-Lowest Common Multiples of numbers up to 1,000 -Fractions -BODMAS -Decimals and whole numbers	- Place numbers under M, H/Th, TTh, Th, H T & U - Solve problems involving factors and multiples - Describe LC M and H C F of numbers - Solve problems involving fractions - Show interest in solving real life problems	- Discovery method - Guided inquiry - Problem solving method - Laboratory method - Cooperative learning - Individualized instruction	-Real objects -Audio video tapes -Abacus -Charts -Recycled materials -Calculator
Measurement and size					
Metric System -mm, cm, dm, m, km ml, cl, dl, litres g, Kg -Shapes (rectangle, square, triangle, trapezium, parallelogram etc) **Calendar** Ordinary and leap year 13 Lunar months 12 Calendar months **Time** -seconds, minutes, hours, Days, week -Distance, Speed and Time -World time zones **Money** -Shopping bills -Foreign currency -Cost Selling price -Profit and loss	-Convert from one unit to another -Calculate areas and perimeters -Associate specific activities to different periods of the day/ year - Solve problems involving Distance, speed and time -Calculate the various time zones - Use money appropriately - Show interest in being punctual	**Metric System** -Length, width, Height, weight and capacity -Shapes **Calendar** -Ordinary and leap year - 13 Lunar months **Time** -Distance, speed and time -World time zones **Money** -Cost price, selling price, profit and loss, discount.	-Convert from one unit to another -Calculate areas and perimeters -Associate specific activities to different periods of the day/year - Solve problems involving Distance, speed and time -Calculate the various time zones - Use money appropriately - Show interest in being punctual - Show awareness of changes in time in different parts of the world	-Discovery Method -Problem Solving Method -Laboratory Method -Cooperative Learning Strategy -Individualized Instruction -Team Teaching -Target Task Approach -Multiple Intelligences Teaching Approach	-Real objects -Audio-video tapes -Pictures -Charts -Metre rule -Scale and litre containers - Globe/maps - Calendars - Calculator -Clock faces

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Material**
-Curves and lines positive & negative numbers from 0 to 30 -Parallel and intersecting lines -Patterns with 2, 3 D shapes. -Triangles, rectangles, squares and circles. -Types of angles (right, obtuse, acute, isosceles) -Mathematical set and content -Quadrilateral, pentagon, hexagon, trapezium, prism	-Draw curves and lines -Differentiate between parallel and intersecting lines -Complete patterns using 2 and 3 dimensional shapes -Measure angles using a protractor -Calculate the area and circumference of circles -Manipulate objects, shapes, letters, and figures in puzzles - Construct different models using plane and other shapes - Show interest in engineering and construction	-Curves and lines Numberline: positive & negative numbers from 0 - 50 -Parallel and intersecting lines -4 D shapes -Mathematical set and content -Quadrilatérals, pentagon, hexagon -Trapezium, prism, cylinders, cone, sphere, cube -Cylinders, cone, sphere, cube	-Draw curves and lines -Differentiate between parallel and intersecting lines -Complete patterns using multiple dimensional shapes -Measure angles using protractor -Calculate the area and circumference of circles -Manipulate objects, shapes, letters, and figures in puzzles -Construct different models using plane and other shapes - Show interest in engineering and construction	-Discovery method -Guided inquiry method -Problem solving method -Laboratory method -Cooperative learning -Individualized instruction	-Real objects -Pictures - Bacus -Charts -Recycled materials -Maths set -Calculator -Cardboard -Cartons
Graphs and statistics					
Data management - Picture representation -Number line -Ranking - Mapping - Referencing -Coordinates -Frequency distribution -Mean - Tallying - Graphs (Bar charts, pie charts, histogram,)	-Represent data using pictures -Locate assigned points on a number line - Arrange in ascending and descending order - Locate points on a map -Interpret relationships on maps -Locate places given the Y- and X- axis -Represent data on charts - Show interest in keeping accurate records	**Data management** -Picture representation -Number line -Ranking - Mapping - Referencing -Coordinates -Frequency distribution -Mean - Graphs (Bar charts, pie charts, histogram, tallying)	- Represent data using pictures - Solve problems involving the number line - Arrange in accending and descending order - Interpret relationships on maps -Locate places given the Y- and X- axis -Represent data on charts - Show interest in keeping accurate records - Show willingness in planning activities	-Discovery Method -Problem Solving Method -Laboratory Method -Cooperative Learning -Individualized Instruction	- Pictures - Charts - Models - Maths set

Contents of Science and Technology

Table 22: Science and Technology contents, expected learning outcomes, suggested methodology and didactic materials

Health Education					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	Expected Learning Outcomes	Units / Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Human body - Body systems (digestive, excretory, circulatory and respiratory) -Personal hygiene (care of the body)	- Describe the functioning of the various body systems -Draw and label body systems - Cherish looking neat on daily bases	**Human body** - Body systems - Personal hygiene - Human skeleton -Types of bones	- Maintain a healthy body system - Practise good habits for healthy body system - Explain the importance of the human skeleton - Describe the human skeleton - Follow health rules	-Illustrations -Demonstrations -Practical lessons -Outdoor lessons -Routine and spontaneous inspections	-Real objects like soap, sponge, water, tooth brush, tooth paste -Pictures -Models -Relevant charts
The senses - Nervous system and the senses	-Describe the nervous system -Show the link between the sense organs and the central nervous system -Draw and label the nervous system -Practise health habits	**The Senses** - Nervous System and the senses	- Describe the nervous system - Describe the link between sense organs and the centre nervous system -Practise health habits to maintain a good nervous system	- Illustration -Demonstration -Practical lessons -Outdoor lessons -Questioning	- Real objects - Pictures - Charts - Models
Reproductive Health, STIs and HIV/AIDS -Human reproductive system - STIs -HIV/AIDS	- Describe the human reproductive system - Analyse the effects of pre-marital sex - Discuss the symptoms, causes and ways of preventing HIV/AIDS - Organise mini campaigns for the fight against HIV/AIDS - Show empathy for persons living with and affected by HIV/AIDS	**Reproductive Health, STIs and HIV/AIDS** - Human reproductive system -Family planning -Puberty - Menstrual hygiene - STIs - HIV/AIDS	-Identify good reproductive health practices - Explain concepts related to menstrual hygiene - Describe the symptoms, causes and ways of preventing STIs and HIV/AIDS - Manage puberty with a sense of responsibility - Show empathy for persons living with and affected by HIV/AIDS - Organise school campaigns for the fight against HIV/AIDS	-Guided tours/field trips to health units -Role play/Dramatization -Campaigns -Discussion -Demonstration -Picture reading -Storytelling\Testimonies -Talks by experts -Projects -Debates -Presentations	- Real objects like condoms, gloves, lab coats, cotton, wipes, pads/sanitary towels, gauze, plaster/bandages - Alcohol/spirit disinfectants, wipes - ICT devices - Pictures/charts - Health magazines - Cartoon strips - Health learning centre

Science and Technology contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Diseases and prevention - Transmissible (contiguous and non-contiguous) - Non- transmissible (high blood pressure, obesity, diabetes)	- Classify diseases by their mode of transmission - Demonstrate awareness on some treatment measures - Question road side and auto medication - Practise good health habits - Advise peers/friends about healthy lifestyles	**Diseases and prevention** -Water, insect and air bone diseases - Transmissible diseases - Non-transmissible diseases (high blood pressure, obesity, diabetes disease)	- Associate symptoms to diseases - Explain some treatment - Practise good health habits - Assess avoidable causes of diseases - Advise peers about healthy lifestyles - Question road side and auto medication	-Discussion -Illustrations -Demonstration -Picture reading -Storytelling\Testimonies -Excursions -Talks by experts -Projects -CL	- Real objects - ICT devices - Pictures /Charts - Health magazines
Toilets - Usage and ethics - Care of toilets	- Use toilets responsibly - Clean toilets using appropriate materials - Wash hands after using the toilet - Use different types of toilets as the need arises	**Toilets** - Usage and ethics - Care of toilets	- Use toilets responsibly - Manage different types of toilets - Clean toilets using appropriate materials - Wash hands at all times after using the toilet - Use different types of toilets as the need arises	- Discovery - Illustration - Demonstration - Practical lessons - Out door lessons - Inspection of toilets	-Real objects like disinfectants, brooms, mops, rags, buckets, water, gloves, wood ash -Pictures/charts

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Health Habits - Good health habits - Medication and drug education	- Practise good health habits - Question the use of unprescribed medicines - Stay away from friends/ places who/that can lead to taking drugs	**Health Habits** -Good health habits - Drug education	-Practise good health habits -Question the use of unprescribed medicines -Stay away from friends/ places who/that can lead to taking drugs	- Discovery -Illustrations -Demonstrations -Practical lessons -Outdoor lessons - Spontaneous inspections	- Charts - Video tapes - Drawings - Real objects - ICT devices - Pictures
Food and Nutrition - Types of foods - Classes of food	- Classify food following their nutritive value - Discuss the nutritional value of food - Develop healthy eating habits	**Food and nutrition** - Types of food - Food classes	-Classify food following their nutritive value -Associate different classes of food to various age groups and occupations -Develop healthy eating habits	- Discovery - Illustrations - Demonstrations - Practical lessons - Outdoor lessons	- Food class charts - Pictures - ICT devices - Real objects like fruits, vegetables, tubers
Minor accidents and first aid - Types of minor accidents (sprains, fractures and dislocations, trauma, cuts and bites) - Causes of accidents - Treatment - Essentials for strong bones - First aid contents	- Differentiate between a sprain, fracture and dislocation and preventions - Explain ways of keeping strong bones as a measure to preventing related minor accidents - Prevent related minor accidents - Associate items in the First Aid box to their uses	**Minor Accidents and First Aid** - Types of minor accidents (burns and scalds) - Causes - Characteristics -Treatment - Preventions - First aid box Content and administration	-Differentiate between types of wounds -Explain ways to prevent them -Describe different ways of treating each of them -Demonstrate the administration of First Aid -Explain the importance of a First Aid box	-Discovery -Illustrations -Demonstrations -Practical lessons -Out door lessons	- Charts - Video tapes - Drawings - Real objects - First Aid items

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units /Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Public Health -Types of immunities (natural, acquired and artificial) -Health campaigns (national and international health organizations)	- Identify types of immunities - Identify some local actors in health issues - Analyse the role of vaccinations - Locate health centres in their communities	**Public Health** - Health hazards - Vaccinations - Health campaigns - Health centres	- Identify health hazards in their localities - Predict/prevent health hazards - Explain the importance of vaccines - Participate in health campaigns - Describe services offered in health centres - Report health hazard signs to adults	- Discussions - Illustrations - Demonstrations - Picture reading - Storytelling\ - Testimonies - Excursions -Talks by experts - Projects	- Health posters and charts - Real objects - ICT devices - Pictures - Video tapes - Relevant magazines
Environmental Science					
Community places and services -Church/Mosque -Market -Hospitals/health centres	- Identify various services offered in their communities - Access places for appropriate services -Inform others of places and services available - Use community services responsibly	**Community places and services** -Home environment -School environment -Mosque/Church, post office, bank -Types of environment: land, water, air.	- Identify various services offered in their communities - Access places for appropriate services -Inform others of places and services available - Use community services responsibly - Preserve the environment against pollution	-Discussions -Demonstrations -Illustrations -Projects -Outdoor lessons -Presentations	- Charts - CDs/VCDs - ICT devices - Pictures - Specimen
Animals - Domestic and wild animals -Habitats and care -Modes of nutrition - Uses of animals -Reproduction	-Care for animals -Classify animals by their habitats, mode of nutrition and reproduction - Observe animals and associate them to their modes of nutrition	**Animals** -Domestic and wild -Habitat and care -Modes of nutrition -Uses of animals. -Reproduction	-Differentiate between domestic and wild animals -Describe the different habitats of animals -Care for animals -Discuss the various methods of reproduction	-Discussions -Demonstrations -Illustrations, projects -Outdoor lessons -Presentations	-Charts -Drawings -Real objects -Pictures

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Birds -Domestic and wild birds -Uses of birds -Habitats and care -Reproduction	- Classify birds into domestic and wild - Describe birds according to their features and characteristics - Explain how birds reproduce - Explain uses of birds - Protect birds from extinction - Build a poultry farm/cage - Cherish self-reliance and entrepreneurship	**Birds** -Domestic and wild birds -Habitats and Care -Modes of Feeding for birds	- Classify birds into domestic and wild - Describe birds according to their features and characteristics - Explain how birds reproduce - Explain uses of birds - Protect birds from extinction - Build a poultry farm/cage - Cherish self-reliance and entrepreneurship	- Discussions - Demonstrations - Illustrations - Projects - Outdoor lessons - Presentations	- Drawings - Real objects - ICT devices - Pictures/charts - Illustrative charts - Bird cage
Fishes - Types of fishes - Fishing	- Identify the tools of a fisherman - Describe the different methods of fishing - Run a fishpond (nutrition and reproduction) - Cherish self-reliance and entrepreneurship	**Fishes** - Types - Characteristics - Care	Differentiate the various types of fishes in the locality. Classify fishes Care for fishes	-Discussions -Demonstrations - Illustrations - Projects -Outdoor Lessons, - Presentations, etc.	-Drawings -Real objects -Pictures -Charts

Science and Technology contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units /Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Insects - Types - Mode of reproduction - Social insects - Characteristics of insects	- Identify various types of insects - Classify insects - Explain the activities of social insects - Describe the usefulness of insects - Protect insects	**Insects** - Types of Insects - Products from insects	- Identify various types of insects - Classify insects - Explain the activities of social insects - Describe the usefulness of insects - Protect insects	-Discussions -Demonstrations -Illustrations - Projects - Outdoor lessons - Presentations	- Relevant charts - Relevant pictures - Insect box
Plants -Types - Flowers - Care (flowers/ plants)	- Identify different types of flowers and plants - Identify medicinal plants and flowers - Protect their environment through appropriate use of plants and flowers - Plant flowers and trees	**Plants** -Types of plants in the locality -Types of flowers in the locality -Care of a plant and greenery	- Identify different types of flowers and plants - Identify medicinal plants and flowers - Protect the environment through appropriate use of plants and flowers - Plant flowers and trees	- Discussions - Demonstrations - Illustrations - Projects - Outdoor lessons - Presentations	- Real objects like hoe, machete, seeds, seedlings, manure, cuttings - Relevant pictures/ charts
Matter - States of matter - Water cycle -Sun -Air -Air pressure	- Explain various methods of purifying water - Describe the water cycle - Explain the importance of air and sun light - Demonstrate changes in the state of matter - Conserve the environment	**Matter** - Types of matter - Purification of water - Air	-Explain various methods of purifying water - Describe the water cycle - Explain the importance of air and sun light - Demonstrate changes in the state of matter. -Differentiate the sources of water - Protect water sources - Preserve food appropriately - Conserve the environment	- Discussions - Demonstrations - Illustrations - Projects - Outdoor lessons - Presentations	- Drawings - Real objects - Videos - Pictures/charts

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Pollution and Waste Management - Pollution -Waste management	- Describe the different types of pollution -Differentiate between organic and inorganic waste -Practise waste separation and inform others -Recycle waste - Dispose of waste responsibly	**Pollution and Waste Management** - Pollution - Waste management	- Evaluate types of pollution and their effects - Practise waste separation and inform others - Demonstrate ways of preventing pollution - Dispose of waste appropriately - Show love for cleanliness	- Discussions - Demonstrations - Illustrations - Projects - Presentations - Excursions	- Charts/pictures - VCDs/CDs - Real objects like cartons, dustbins, papers, food waste, plastics
Environmental Hazards -Hazards in the locality (domestic waste, noise pollution, smoke, dirty and stagnant water, bad drainage systems)	- Demonstrate awareness on how to manage environmental hazards - Solve environmental problems - Dispose of waste responsibly	**Environmental Hazards** - Hazards in the locality (domestic waste, noise pollution, smoke, dirty and stagnant water, bad drainage systems)	- Demonstrate awareness on how to manage environmental hazards - Solve environmental problems - Describe ways of preventing hazards - Protect the environment - Carry out actions to fight against climate change	-Discussions -Demonstrations -Illustrations - Projects - Outdoor lessons - Presentations	- Charts/pictures - CDs/VCDs - Real objects like cartons, dustbins, papers
Soils - Types of soils - Characteristics of soil - Uses of soil - Soil enrichment	- Identify different kinds of soils - Explain the different uses of soils - Explain how soil can be enriched for planting - Show interest in gardening and farming	**Soil** - Types of Soils - Importance of Soil - Uses of soil - Soil enrichment	- Identify different kinds of soils - Explain the different uses of soils - Explain how soil can be enriched for planting - Show interest in gardening and farming	-Discussions -Demonstrations -Illustrations -Projects -Guided tours -Gardening -Presentations	- Charts/pictures - Real objects like soils, manure, plastic bags, tyres, seeds, seedlings, cuttings

Technology and Engineering					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	Expected Learning Outcomes	Units / Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Definition of concepts - Technology - Engineering - Types of machines in the locality - Tools	- Use the concepts of technology and engineering - Identify different types of tools and machines - Describe different occupations - Show love for constructing miniature products	**Definition of concepts** - Technology - Engineering - Types of machines in the locality - Tools	-- Use the concepts of technology and engineering - Identify different types of tools and machines - Describe different occupations - Construct miniature products	-Discussions -Demonstrations -Trial and error -Illustrations -Projects -Outdoor lessons -Presentations	-Charts/pictures -CDs/VCDs -Drawings -Real objects -ICT devices -Technological tools
Construction - Construction materials - Building construction - Civil engineering (Road construction) - Plumbing	- Identify construction materials - Construct various infrastructure and figures - Maintain infrastructure, pavements, gutters and equipment - Show love for architecture and plumbing	**Construction** - Construction materials - Building construction - Road construction	- Identify construction materials - Construct various infrastructure and figures - Maintain infrastructure, pavements, gutters and equipment - Show love for appropriate architecture	- Trial and error - Cooperative learning - Projects - Illustrations - Guided tours to building sites	Sawdust, clay, sand, cement, moulds, red soil, saw, hammer, nails, palm fronds, pith, bamboos, cane, grass, ropes, water, buckets, jackets, tapes, gloves, boots, helmets, masks, iron rods, wood , used pipes
Telecommunications - Telephones - Radio/TV - Camera - Fax machine	- Describe the operating systems of telephones, radios and televisions - Produce miniature, cameras phones, radios and TV - Use telecommunication devices responsibly	**Telecommunications** - Telephones - Radio/TV - Fax	- Explain the operating systems of telephones, radios TVs - Use the operating systems of telecommunication devices to produce telecommunication models - Use telecommunication devices responsibly	- Trial and error - Cooperative learning - Projects - Illustrations - Guided tours to relevant places	Fix /mobile phones, radios, fax machines, TV, cameras

Science and Technology contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Energy - Sources of energy - Forms of energy - Uses of energy	- Identify different sources/ forms of energy - Explain the uses of energy - Stay away from danger	**Energy** - Sources of energy - Forms of energy - Uses of energy - Production of energy	-Differentiate sources of energy - Explain how to use energy appropriately - Demonstrate how energy can be transformed - Demonstrate possible ways of producing energy in their environment - Stay away from danger	- Discussions - Demonstration - Illustrations - Trial and error - Projects - Outdoor lessons/ excusions - Presentations	- Charts, video tapes - ICT devices - Pictures, dung - Used cables, iron filing, iron, metals
Electricity - Electrical devices - Dangers of electricity - Wiring	- Identify electrical devices - Use electricity and electrical devices correctly - Explain safety measures to be taken while using or installing electrical devices - Avoid playing with electrical devices	**Electricity** - Conductors - Insulators - Electrical devices dangers of electricity	- Identify electrical devices - Use electricity and electrical devices correctly - Explain safety measures to be taken while using or installing electrical devices - Avoid playing with electrical devices	- Discussions - Demonstrations - Illustrations - Projects - Outdoor lessons - Presentations	- Charts, video tapes - Safe cables, bathing slippers, testers, masks, gloves - Bulbs, switches, plastic buckets, wood
Forces Types of forces (pull and push) friction	- Distinguish between tension and compression forces - Apply the right type of force when producing equipment	**Forces** -Types of forces (pull and push) tension and compression forces - Friction	- Associate the forces to different activities -Apply the right type of force when producing equipment	- Discussions - Demonstrations - Projects - Outdoor lessons - Presentations	- Charts, video tapes, drawings real objects - ICT devices, pictures - Cables, plugs
Safety and security - Safety measures - Security equipment	- Apply safety rules at all times - Use appropriate protective equipment at all times	**Safety and security** - Safety measures - Security equipment	- Apply safety rules at all times - Use appropriate protective equipment at all times	- Discussions - Demonstrations - Illustrations - Outdoor lessons	- Helmets, masks - Protective glasses - Plastic slippers - Gloves, insulators - Lab coats, boots

German occupation of Cameroon - German Annexation - German activities in Cameroon - Effects of German activities in Cameroon -Pacification of Cameroon - Charles Atangana - Fon Galega I - King Manga Bell - King Akwa - Sultan Njoya	- Explain how the Germans annexed Cameroon - Describe German activities in Cameroon after the annexation - Analyse the effects of German activities in Cameroon - Appreciate German contribution to Cameroon's development - Show willingness in sharing with peers/friends	**German occupation of Cameroon** - German Annexation - German activities in Cameroon - Effects of German activities in Cameroon -Pacification of Cameroon - Charles Atangana - Fon Galega I - King Manga Bell - King Akwa - Sultan Njoya	- Explain how the Germans annexed Cameroon - Describe German activities in Cameroon after the annexation - Analyse the effects of German activities in Cameroon - Appreciate German contribution to Cameroon's development - Show willingness in sharing with peers/friends	-Visits to oral sources -Use of resource persons -Excursion to archaeological sites -Debates -Storytelling -Enquiries and data collection -Drawing and painting -Role play and simulation	- Maps -Charts -Pictures -Paintings -Newspapers -Magazines -Models -Audio visual material
German occupation of Cameroon - Annexation - Activities -Pacification of Cameroon - Charles Atangana - Fon Galega I - King Manga Bell - King Akwa - Sultan Njoya	- Explain how the Germans annexed Cameroon - Describe German activities in Cameroon after annexation - Analyse the effects of German activities in Cameroon - Share with peers/friends	**German occupation of Cameroon** - Annexation - Activities and effects -Pacification of Cameroon - Charles Atangana - Fon Galega I - King Manga Bell - King Akwa - Sultan Njoya	- Explain how the Germans annexed Cameroon - Describe German activities in Cameroon after annexation - Analyse the effects of German activities in Cameroon - Share with peers/friends	Visits to oral sources -Use of resource persons -Excursion to archaeological sites - Debates -Storytelling -Enquiries -Drawing / painting - Role play/ simulation	- Newspapers - Models - Audio-visual aids - Pictures - Records - Relics - Paintings

Geography					
Physical Geography					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	Expected Learning Outcomes	Units/Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Plans and Maps - Plans and Maps - Map of Cameroon	- Draw plans of places in their locality - Locate places on a map - Follow directions and use a Global Positioning Systems (GSP)	**The planetary system and the earth** - The solar system - Earth's shape and movements	- Describe the solar system - Describe all the planets - Associate longitudes / latitudes to the various earth's movements - Plan activities/phone calls in function of time zones	-Enquiries and data collection -Drawing and painting -Cooperative learning -Flipped classroom	-Maps -Charts -Pictures -Statistics - Stencils
Cameroon - Position and size -Administrative units - Physical features	- Draw the map of Cameroon - Locate the administrative units of Cameroon - Identify the physical features of Cameroon - Show love for living in any part of Cameroon	**Africa and the world** -Position and size -Climate and vegetation -Relief and drainage - The continents oceans, mountains seas and rivers	- Label the map of Africa - Identify some major mountains, seas and rivers of the world - Classify the different continents and oceans of the world - Explain the main types of economic activities in Africa - Show interest in economic activities practised in their communities	- Enquiries and data collection -Drawing and painting -Cooperative learning -Flipped classroom -Research	-Relics -Paintings -Newspapers -Magazines -Models - Audio visual material
Cameroon climate and vegetation - Climate and vegetation zones - Climate change	- Classify the various climatic/vegetation zones in Cameroon - Explain the causes and effects of climate change - Protect the environment	**Cameroon climate and vegetation** - Climate and vegetation zones - Climate change	- Evaluate the causes and effects of climate change - Protect the environment.	- Enquiries and data collection -Drawing and painting -Cooperative learning -Flipped classroom	-Maps and Charts -Pictures -Models -Audio - visual material

Human and Economic Geography					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	Expected Learning Outcomes	Units/Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Population - Demography (Birth rate, death rate) - Population density - Settlements (rural and urban) - Migration	- Explain concepts related to population growth - Differentiate between types of settlements - Describe the different types of migration - Cultivate the spirit of living with others	**Population** - Demography (Birth rate, death rate) - Population density - Settlements (rural and urban) - Migration	- Relate population density to human activities - Appreciate various settlements - Analyse the causes and effects of migration - Cultivate the spirit of living with others	- Invite resource persons - Excursion - Debates - Enquiries and data collection - Interview and research	- Maps - Charts - Pictures - Newspapers - Magazines - Models - Audio visual material
Economic and human activities - Agriculture - Transportation - Trade	- Identify various economic and human activities - Explain the importance of economic activities - Show interest in entrepreneurship and self-reliance	**Economic and human activities** - Agriculture - Transportation - Trade	- Analyze the contribution of economic activities to the development of Cameroon - Show interest in entrepreneurship and self-reliance	- Use of resource persons - Debates - CL	- Realia - Newspapers - Magazines - Models - Audio visual material

Citizenship					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	Expected Learning Outcomes	Units/Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Civics - National Emblems - Rules and Regulations - The highway code - State Institutions and personalities - Elections - Local and International institutions	- Identify national emblems - Explain the significance of national emblems - Sing the National Anthem - Respect rules and regulations - Respect the highway code - Identify the various arms of government and their functions -Describe democratic electoral processes -Identify international and local organisations that can assist school projects - Demonstrate the spirit of patriotism - Respect authority	**Civics** - National Emblems - Rules and regulations - The highway code - State Institutions, personalities - Elections - International and local institutions	- Explain the significance of national emblems - Sing the National Anthem - Respect rules and regulations -Respect the highway code - Identify the various arms of government and their functions -Describe democratic electoral processes -Identify local and international organisations that can assist school projects - Demonstrate the spirit of patriotism - Respect authority	- Invite resource persons - Excursion to some places in the locality - Debates - Role-play and simulation - Interview and research - CL - PBL - Mind-mapping	- National emblems (gadgets) - Charts - Pictures - Newspapers - Magazines - Models - Audio visual material

Social Studies contents, expected learning outcomes, methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Moral education - Simple etiquettes (greetings, politeness, honesty, table manners, obedience, sharing, punctuality, love)	- Comply with simple etiquettes - Conform to societal norms - Support living with others	**Moral education** - Simple etiquettes (greetings, politeness, honesty, table manners, obedience, sharing, punctuality, love)	- Comply with simple etiquettes - Conform to societal norms - Support living with others	- Demonstration/Dialogue - Role-play/ Storytelling - Peer work/ buzz groups - Cooperative learning	- Illustrative charts/ posters, pictures, cutleries, food, water, bowl for washing hands - Real objects
Human rights and freedoms - Notions of human Rights and freedoms - Exploitation, violence, harassment, trafficking, child labour - Rights and responsibilities of children	- Explain fundamental human rights and freedoms - Denounce cases of human rights abuse - Display respect of human rights and freedoms - Practise responsible behaviour	**Human rights and freedoms** - Notions of human rights and freedoms - Exploitation, violence, harassment, trafficking, child labour -Rights and responsibilities of children	- Explain fundamental human rights and freedoms - Denounce cases of human rights abuse -Display respect of human rights and freedoms -Practise responsible behaviour	- Invite resource persons - Excursions - Class debates - Enquiries and data collection - Role play and simulation - Interview and research	- Documentation on human rights and freedoms - Charts - Pictures - Newspapers - Magazines - Models - Audio visual material
Peace and security - Peace - Safety/Security measures - Conflict management	- Promote peace and harmonious living - Report cases of abuse - Discriminate dangerous people and places	**Peace and security** - Peace - Safety/Security measures - Conflict management	- Promote peace and harmonious living - Report cases of abuse - Discriminate dangerous people and places	- Invite resource persons - Excursions - Demonstration - Debates - Enquiries and data collection - Role-play and simulation	- Documentation - Safety gadgets - Charts/pictures - Newspapers - Magazines - Audio visual material

Contents of Vocational Studies

Table 25: Vocational Studies contents, expected learning outcomes, suggested methodology and didactic materials

Home Economics					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units and Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Needle Work - Needle work equipment - Stitches - Seams - Openings - Fastenings - Fullness	- Stitch torn uniforms and clothes - Cut out patterns from cloth - Sew stitches on different types of clothes - Sew buttons, zips and hook and eye on clothes - Sew aprons, bags, dusters, bibs and simple clothes - Show love for needlework and sewing	**Needle Work** - Needle work equipment - Stitches - Seams - Openings - Fastenings - Fullness	- Stitch torn uniforms and clothes - Cut out patterns from cloth - Sew stitches on different types of clothes. - Sew buttons, zips and hook and eye on clothes - Sew aprons, bags, dusters, bibs and simple clothes - Show love for needlework and sewing	- Cooperative Learning - Individualized Instruction - Team Teaching - Target task instruction - Invite resource persons - Practical work - Visit to a tailor's shop	- Needle, scissors - Tapes, cutting board - Sewing machines - Cloth, chalk, buttons - Cement or flour - Papers, thread, hook and eye, torn clothes, scraps from tailor's shop
Food and nutrition - Foods/fruits - Meals - Laying the table	- Conserve food and fruits - Identify items used in laying the table - Prepare different types of meals for different people and occasions - Practise healthy eating habits	**Food and nutrition** - Foods/fruits - Meals - Laying the table	- Conserve food and fruits - Identify items used in laying the table - Prepare different types of meals for different people and occasions - Practise healthy eating habits	- Cooperative Learning - Individualized instruction - Educative talks - Practical work	- Real object like tablecloth, paper napkins, cutlery - Different types of food and fruits, plates, pots

Vocational Studies contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Laundry - Equipment - Procedures - Washing detergents	- Wash different types of clothes/materials using appropriate techniques - Produce detergents from local materials - Show interest in being neat and organised	**Laundry and dyeing** - Equipment - Procedures - Washing detergents - "Tie and dye"	- Wash different types of clothes/materials using appropriate techniques. - Produce detergents from local materials - Dye clothes using local materials - Show interest in being neat and organised	- Cooperative Learning - Individualized instruction - Visits to laundry sites and "tie and dye" workshop	- Basins/buckets - Soaps - Bleaching agents - Brush/water - Baking soda - Wood ash - Pear/kolanut seeds - Flowers
House Craft - Household equipment and sections - House care	- Describe different sections of a house - Demonstrate how to care for different sections of a house	**House Craft** - Household equipment and sections - House care	- Describe different sections of a house - Demonstrate how to care for a house	- Cooperative Learning - Individualized instruction - Illustrations - Demonstrations - Role-play	- Real objects related to house care - Audio-visual aids - Pictures - Charts

Arts and Crafts					
CLASS 5		CLASS 6		Methodology and Didactic Materials	
Units and Contents	Expected Learning Outcomes	Units / Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Types of Toolboxes - Moulder - Weaver - Painter	- Constitute a tool box - Use tools for minor maintenance - Produce different objects - Clean tools - Show interest in craftsmanship	**Types of Tools** - Moulder - Carpenter - Weaver - Sculptor - Painter	- Constitute a tool box - Use tools for minor maintenance - Produce different objects - Clean tools - Show interest in craftsmanship	- Flipped classroom - Cooperative learning - Demonstration - Role-play	-Stones/shells -Carpenter's pencil -Tape measure -Nail puller -Utility knife -Hammar/nails -Hoe/cutlass -Thread/fibre -Corks -Scissors
Tools - Contents of a tool box - Uses of the various tools in the tool box	- Constitute a tool box	**Tools** -Contents of a tool box -Uses of the various tools in the tool box	- Constitute a tool box. - Use tools to maintain equipment.	- Flipped classroom - Cooperative learning - Demonstration - Role-play	-Nails -Hammer -Screw drivers -Scissors
Folding	-Fold different materials to produce different designs	**Folding**	-Fold different materials to produce different designs	- Cooperative learning - Demonstration - Practical work	-Papers -Pieces of cloth
Cutting -Different shapes	-Cut different materials to produce shapes, figures and objects	**Cutting** -Different shapes	-Cut different materials to produce shapes, figures and objects	- Cooperative learning - Demonstration - Practical work	-Papers -Pieces of cloth -Scissors - Pins -Razor blades

Vocational Studies contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Making objects Ropes, balls. brooms, blinds	-Use materials from the environment to produce different objects	**Objects** Ropes, balls brooms, blinds	-Use materials from the environment to produce different objects	- Cooperative learning - Individualized instruction - Target task instruction -Practical work	-Leaves, plastic bags, ropes, rubber -Scraps from tailor's shop -Cotton -Old clothes -Palm fronds
Moulding - Models - Pots - Cups/bowls	-Prepare moulding paste -Mould objects, shapes and figures	**Moulding** - Models - Pots - Cups/bowls	-Prepare moulding paste -Mould objects, shapes and figures	- Cooperative learning - Individualized instruction - Target task instruction - Practical work	-Flour -Water -Clay -Mud
Decoration -Decoration items -Types of decoration	-Produce a variety of decoration items. -Decorate the classes, schools and home	**Decoration** -Decoration items -Types of decoration	-Produce a variety of decoration items -Decorate the classroom, the school and the home	- Cooperative learning - Individualized instruction - Target task instruction - Practical work	-Flowers, cardboards -Papers, toilet tissues -Glue, pins, ropes
Weaving Mat, cap, dress, net	-Use materials from the environment to weave objects	**Weaving** Mat, cap, dress, net	-Use materials from the environment to weave objects	- Cooperative learning - Individualized instruction - Practical work	-Leaves, cane -Ropes, fibre -Old bags -Knitting

Agro-Pastoral Farming					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units / Contents	Expected Learning Outcomes	Units / Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Agricultural Tools - Uses	- Identify various agricultural tools -Maintain agricultural equipment - Show love for agriculture	**Agricultural Tools** - Uses	-Identify various agricultural tools -Maintain agricultural equipment -Show love for agriculture	- Cooperative learning - Role-play and simulations	-Hoes, cutlass -Diggers, spades -Wheel barrows -Knives, phials
Farming and Gardening - Clearing - Tilling - Planting -Weeding	- Till the soil - Plant crops and flowers - Weed gardens and farms - Show love for keeping surroundings clean	**Farming and Gardening** -Clearing -Tilling -Planting -Weeding	- Till the soil - Plant crops and flowers - Weed gardens and farms - Show love for keeping surroundings clean	- Cooperative learning - Practical work - Guided tours	-Hoe, cutlass -Knife, spade -Wheel barrow -Pictures, charts -Audio/visual aids
Soil enrichment - Types of soils - Compost manure - Animal dung	- Identify various types of soils - Enrich the soil using different kinds of manure - Volunteer to take part in agricultural activities	**Soil enrichment** - Types of soils - Compost manure - Animal dung	- Identify various types of soils - Enrich the soil using different kinds of manure - Volunteer to take part in agricultural activities	- Cooperative learning - Practical work - Guided tours	-Manure/dung/ dropplings -Soils/gloves -Cutlass -Hoe -Diggers -Peelings from food and fruits

Vocational Studies contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Seed germination - Weeding - Mulching - Thinning - Harvesting - Seed preservation	- Plant seeds in the environment - Run a nursery of local plants - Show willingness to wait for their turn	**Seed germination** - Weeding - Mulching - Thinning - Harvesting - Seed preservation	- Plant seeds in the environment - Run a nursery of local plants - Show willingness to wait for their turn	- Cooperative learning - Practical work - Flipped classroom	-Hoe/cutlass -Digger -Spade -Bags -Wheel barrow
Life stock farming - Piggery, poultry, cattle rearing, sheep, goat, snails, rabbitrary	- Produce animal feed - Grow animals - Show love for supporting family and community through animal rearing	**Life stock farming** - Piggery, poultry, cattle rearing, sheep, goat, snails, rabbitrary	- Produce animal feed - Grow animals - Show love for supporting family and community through animal rearing	- Cooperative learning - Practical work - Guided tours - Use of resource persons	-Animals -Animal feed, -Sticks/wires/ropes -Water -Snails, snail shells -Chicks -Gloves/mouth shield
Veterinary care - Different livestock - Diseases - Veterinary services	- Match various livestock to diseases - Identify medicine for various animal infection - Follow professional advice at all times	**Veterinary care** - Different livestock - Diseases - Veterinary services	- Match various livestock to diseases - Identify medicine for various animal infection - Follow professional advice at all times	- Cooperative learning - Practical work - Guided tours to veterinary centres - Use of resource persons	-Animals -Charts containing relevant animals -Syringes -Veterinary doctor's equipment -Gloves/mouth shield

Contents of Arts

Visual Arts					
CLASS 5		**CLASS 6**		**Suggested Methodology and Didactic Materials**	
Units/ Contents	**Expected Learning Outcomes**	**Units/Contents**	**Expected Learning Outcomes**	**Suggested Teaching/ Learning Strategies**	**Didactic Materials**
Painting - Materials - Paints	- Identify painting materials - Paint artworks/objects using appropriate colour combinations - Show interest in beauty	**Painting** - Materials - Paints	- Identify painting materials - Paint artworks/objects using appropriate colour combinations - Describe feelings conveyed in artistic works - Show interest in beauty	- Individual and collaborative work - Guided tours - Demonstrations - Cooperative learning	-Charts/pictures -Painting brush -Coloured pencils -Paints, masks, gloves -Buckets, water -Audio-visual aids
Ceramics - Materials - Moulding	- Identify materials used for producing ceramics - Produce ceramics - Show interest in recycling materials	**Ceramics** - Materials - Moulding	- Identify materials used for producing ceramics - Produce ceramics - Beautify ceramics using appropriate colours - Show interest in recycling materials	- Individual and collaborative work - Guided tours - Demonstration/ practical - Cooperative learning	-Charts/pictures -Pots, flower vases -Clay, moulds, tiles -Cement, sand, masks -Waters, gloves -Audio-visual aids
Photography - Materials - Snapping/photos	- Identify materials used in producing photographs - Snap pictures using appropriate focus - Show love for photographing	**Photography** - Materials - Snapping/ photos	- Identify materials used in producing photographs - Snap pictures using appropriate focus - Explain feelings conveyed in various images/pictures - Show love for photographing	- Individual and collaborative work - Guided tours - Demonstration - Trial and error - Cooperative learning	-Pictures, cameras -Smart phones, battery -Waters -Gloves, masks -Paper, envelops -Films
Architecture - Materials - House plans	- Identify materials used by an architect - Draw miniature house plans and houses - Appreciate planning	**Architecture** - Materials - House plans	- Identify materials used by an architect - Draw miniature house plans and houses - Appreciate planning	- Individual and collaborative work - Guided tours to building sites - Demonstration - Practice sessions - Drawing plans	-Charts/pictures -Stencils, rulers -Cardboard -Pencils/pens -Felt pens

Arts contents, expected learning outcomes, suggested methodology and didactic materials

Performing Arts					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/Contents	Expected Learning Outcomes	Units / Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Dance - Original dance steps - Rhythm - Traditional and modern dance steps	- Demonstrate different dance steps - Follow rhythm/beats in dancing - Display self-esteem	**Steps** - Original dance steps	- Demonstrate different dance steps - Follow rhythm/beats in dancing - Produce beats/rhythms - Display self-esteem	- Singing and dancing - Demonstrations from resource/skilled persons - Cooperative learning - Miming and mimicking	-Songs, tapes -Drums, xylophones -Guitar, whistles, gongs -Flutes, rattles, bands -Costumes
Music - Musical instruments - Rhythms, melodies and parts - Sol-fa notations	- Identify various musical instruments - Play musical instruments of their choice - Sing following parts - Show love for music and entertainment	**Music** - Musical instruments - Rhythms, melodies and parts - Sol-fa notations	- Identify various musical instruments - Play musical instruments of their choice - Sing following parts - Show love for music and entertainment	- Singing - Conducting - Cooperative learning - Humming - Chanting - Use of relevant resource persons	-Songs, tapes -Drums, xylophones -Guitar, whistles, gongs -Flutes, bands, costumes -Mouth organ, piano -Trumpets, rattles -Violins, cymbals
Theatre/Drama - Sketches/Poems - Stage plays	- Write short sketches/ poems - Act roles using appropriate costumes - Mimic roles	**Theatre/Drama** - Sketches/Poems - Stage plays	- Write short sketches - Modify sketches into scenes - Interpret roles - Mimic roles	- Role play/dramatization - Memorisation - Chanting/humming - Imitation/mimicking - Demonstration	-Costumes, sketches -Musical instruments -Audio-visual aids -Stage props

Contents of Physical Education and Sports

Table 27: Physical Education and Sports contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Unit/Contents	**Expected Learning Outcomes**	**Unit/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Movement/ Rhythmic Activities -Balancing -Matching -Galloping -Hop scotch -Folk dance, -Ballet dance -Pacing calisthenics	- Build up strong muscles - Stay focused - Follow appropriate dance steps - Show interest in working harmoniously	**Movement/Rhythmic** - Galloping - Folk dance - Ballet dance - Pacing calisthenics	- Build up strong muscles - Follow appropriate dance steps - Show interest in working harmoniously	- Demonstrations - Illustrations - Observation and imitation	-Whistles, ropes -Chalk, clay -Wood ash, balls -Sportswear -Clappers -Towel -Bucket -Water
Sprints / Relays - 40 metres - 60 metres - 3 by 60 metres	- Run fast over a given distance maintaining speed - Build a healthy graceful and balanced body - Accept defeat	**Sprints / Relays** - 60 metres - 100 metres - 4 by 100 metres	- Run fast over a given distance maintaining speed - Build a healthy graceful and balanced body - Accept defeat	- Demonstrations - Illustrations - Observation and imitation	-Clappers, whistles -Wood ash -Sportswear -Water -Towel -Bucket -Stick
Long distance race - 200 metres - 300 metres	- Control breath while running at a regular pace - Build a healthy graceful and balanced body - Accept defeat	**Long distance race** - 200 metres - 300 metres - 400 metres - 500 metres	- Control breath while running at a regular pace - Build a healthy graceful and balanced body - Accept defeat	- Demonstrations - Illustrations - Observation and imitation	-Clappers -Ropes -Sticks -Whistles -Bucket/water -Towel/sportswear -Wood ash
Jumps - High jump - Long jump	- Jump over an obstacle in a coordinated manner - Practise jumping across lengths in a coordinated manner - Use appropriate measures when need arises	**Jumps** - High jump - Long jump	- Jump over an obstacle in a coordinated manner - Practise jumping across lengths in a coordinated manner - Use appropriate measures when need arises	- Demonstrations - Explanation - Listening - Observation and imitation	-Clappers -Ropes -Sticks -Whistles -Bucket -Water -Towel -Sportswear

Physical Education and Sports contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Unit/Contents	**Expected Learning Outcomes**	**Unit/Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Throws - Shot put - Javeline - Discuss	- Throw objects in a coordinated manner to meet a target - Use appropriate measures to reach targets	**Throws** - Shot put - Javeline - Discus	- Throw objects in a coordinated manner to meet a target - Use appropriate measures to reach targets	- Explanation - Discussion - Demonstrations - Illustrations	-Spear -Discus -Towel, water, bucket -Sportswear
Team sports - Football - Handball - Volleyball - Basketball - Table tennis - Lawn tennis - Cricket	- Identify basic rules of each team sports - Practise team sports - Practise fair play and fairness - Manifest team spirit	**Team sports** - Football - Handball - Volleyball - Basketball - Table tennis - Lawn tennis - Cricket	- Identify basic rules of each team sports - Practise team sports of their choice - Practise fair play and fairness - Manifest team spirit	- Explanation - Discussion - Demonstrations - Illustrations	-Balls, whistles, basket -Nets, bats, tables, cuts -Taps, pecks, paint -Sportswear -Water -Buckets, towel -Charcoal
Gymnastics - Cart wheel - Forward roll - Backward roll - Head balance - Hand balance	- Use different postures to maintain stability - Show willingness for being smart and active	**Gymnastics** - Cart wheel - Forward roll - Backward roll - Head balance - Hand balance	- Use different postures to maintain stability - Show willingness for being smart and active	- Explanation - Discussion - Demonstrations - Illustrations - Imitation	-Whistles -Sportswear -Bucket -Water -Towel

Contents of National Languages and Cultures

Table 28: National Languages and Cultures contents, expected learning outcomes, suggested methodology and didactic materials

Listening and Speaking					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units /Contents	Expected Learning Outcomes	Units /Contents	Expected Learning Outcomes	Teaching/Learning Strategies	Didactic Materials
Generalities on NLC - My language - Language zones in the region - National language cartography	- Identify their and other languages spoken in the region - Identify languages in their regions - Label the language zones of Cameroon	**Generalities on NLC** - My language - Language zones in the region - National language cartography	- Identify their and other languages spoken in the region - Identify languages in their regions - Label the language zones of Cameroon	- Brainstorming - Discussion - Demonstration - Conservation and dialogue - Research and assignments	- Relevant charts - The map of Cameroon - Charts/pictures - Video and audio clips - Language lists
Elements of culture - Symbols (objects, gestures, sound, images) - Language (Body language, proverbs) Values (communal life, conflict/problem resolution, dressing for various ceremonies, food, songs/dance)	- Identify the elements that constitute the culture of a people - Explain cultural symbols - Describe different cultural gestures or body language - Display polite body language - Interpret elements of their culture - Cherish their cultural identity	**Elements of culture** - Symbols (objects, gestures, sound, images) - Language (Body language, proverbs) Values (communal life, conflict/ problem resolution, dressing for various ceremonies, food, songs/dance)	- Identify the elements that constitute the culture of a people - Explain cultural symbols - Describe different cultural gestures or body language - Display polite body language - Interpret elements of their culture - Cherish their cultural identity	- Discussions - Demonstrations - Flipped classrooms - Simulations and role-play - Cooperative learning	- Real objects related to the contents - Illustrative charts related to the contents - Relevant pictures - Video and audio clips
Polite forms - Responses - Requests	- Use appropriate polite responses and requests - Address people appropriately; - Listen attentively Speak in turns using the right intonation	**Polite forms** - Responses - Requests	- Use appropriate polite responses and requests - Address people appropriately; - Listen attentively Speak in turns using the right intonation	- Cooperative learning - Flipped classroom - Demonstrations - Illustrations - Simulation/role-play	- Real objects - Charts/pictures - Print documents - Video and audio clips

National Languages and Cultures contents, expected learning outcomes, suggested methodology and didactic materials

Units /Contents	**Expected Learning Outcomes**	**Units /Contents**	**Expected Learning Outcomes**	**Teaching/Learning Strategies**	**Didactic Materials**
Descriptions - Natural phenomena - Apparitions - Traditional artefacts	- Use appropriate words to describe the various cultural aspects - Interpret phenomena - Draw lessons from the events - Differentiate between myth and science	**Descriptions** - Natural phenomena - Apparitions - Traditional artefacts	- Use appropriate words to describe the various cultural aspects - Interpret phenomena - Draw lessons from the events - Differentiate between myth and science	- Cooperative learning - Flipped classroom - Discussions - Demonstrations - Illustrations - Simulation/role-play	- Real objects - Charts/pictures - Print documents - Video and audio clips
Beliefs and practices - Birth and naming of children - Marriage - Death - Health	- Recognise traditional beliefs related to birth, naming of a child, marriage, death and health - Treasure positive traditional beliefs and practices	**Beliefs and practices** - Birth and naming of children - Marriage - Death - Health	- Recognise traditional beliefs related to birth, naming of a child, marriage, death and health - Treasure positive traditional beliefs and practices	- Brainstorming and predictions - Use of resource persons and places - Visits to resource places - Role-play and simulations	- Relevant charts and pictures - Real objects related to the contents - Medicinal plants - Repertoire of local names and meanings
Oral traditions - Stories - Folktales - Songs - Recitations	- Recount some authentic oral traditions - Develop the act of eloquence - Appreciate the role of oral traditions in development	**Oral traditions** - Stories - Folktales - Songs - Recitations	- Recount some authentic oral traditions - Develop the act of eloquence - Appreciate the role of oral traditions in development	- Brainstorming and predictions - Storytelling and narrations - Use of resource persons and places - Flipped classrooms	- Resource places - Libraries - Recorded stories, tales, proverbs, fables and historical narratives

Reading					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units /Contents	Expected Learning Outcomes	Units /Contents	Expected Learning Outcomes	Teaching/ Learning Strategies	Didactic Materials
- Simple words with two or more syllables	- Read two or more syllable words correctly	- Simple words with two or more syllables	- Read two or more syllable words correctly	- Cooperative learning - Demonstrations - Reading aloud - Simulation/role-play	- Real objects - Charts/pictures - Print documents - GACL flip chart - Letter/word cards
Reading aloud - Short texts of two or more sentences	- Read short messages of two or more sentences - Use appropriate words to describe pictures	**Reading aloud** - Short texts of two or more sentences	- Read short messages of two or more sentences - Use appropriate words to describe pictures	- Cooperative learning - Flipped classroom - Discussions - Demonstrations - Reading aloud	- Real objects - Charts/pictures - Print documents - GACL flip chart - Letter/word cards - Puzzles
Numbers 1 - 80	- Read numbers from 1 to 80	**Numbers 1 - 100**	- Read numbers from 1 to 100	- Cooperative learning - Flipped classroom - Illustration	- Real objects - Charts/pictures - Number cards
Writing					
Short messages	- Write short messages of two or more sentences	**Short messages**	- Write short messages of two or more sentences	- Cooperative learning - Flipped classroom - Demonstrations - Writing	- Labelled objects - Charts/pictures - Writing material
Simple words with two or more syllables	- Write simple words correctly	Simple words with two or more syllables	- Write simple words correctly	- Cooperative learning - Flipped classroom - Demonstrations - Illustration	- Real objects - Charts/pictures - Print documents - Word cards
Numbers 1 - 80	Write numbers from 1 to 80	Numbers 1 - 100	Write numbers from 1 to 100	- Cooperative learning - Flipped classroom - Illustration	- Real objects - Charts/picture - Number cards

Grammar and Vocabulary					
CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units /Contents	Expected Learning Outcomes	Units /Contents	Expected Learning Outcomes	Teaching/ Learning Strategies	Didactic Materials
Parts of speech (prepositions, conjunctions, adjectives, adverbs,) -Short messages of two or more sentences	- Use various parts of speech in sentences correctly	**Parts of speech** (prepositions, conjunctions, adjectives, adverbs,) -Short messages of two or more sentences	- Use various parts of speech in sentences correctly	- Cooperative learning - Flipped classroom - Discussions - Demonstrations - Illustration	- Real objects - Charts/pictures - Print documents - GACL flip chart
Dialogue and conversation	- Handle a conversation in a national language	**Dialogue and conversation**	- Handle a conversation in a national language	-Flipped classroom -Demonstrations -Illustration	- Real objects - Charts/picture - Puzzles
Simple sentences Subject, verb, object	- Read simple sentences correctly - Show interest in reading	**Simple sentences** Subject, verb, object	- Read simple sentences correctly - Show interest in reading	- Cooperative learning - Flipped classroom - Demonstrations - Illustration	- Real objects - Charts/pictures - Puzzles
Vocabulary Simple words drawn from the various ILT	- Use new words in a conversation - Show love for learning new words and languages	**Vocabulary** -Months and seasons of the year - Simple words drawn from the various ILT	- Use new words in a conversation - Show love for learning new words and languages	- Cooperative learning - Flipped classroom - Discussions - Demonstrations - Illustration - Simulation/role-play	- Real objects - Charts/pictures - Print documents - Word cards - Puzzles

Contents of Information and Communication Technologies

Table 29: ICT contents, expected learning outcomes, suggested methodology and didactic materials

Basic knowledge of Computer Systems and ICT Productivity Tools					
CLASS 5		**CLASS 6**		**Suggested Methodology and Didactic Materials**	
Units /Contents	**Expected Learning Outcomes**	**Units /Contents**	**Expected Learning Outcomes**	**Teaching and Learning Strategies**	**Didactic Materials**
Components of the computer system - key board - Mouse - Monitor - Printer	- Connect the different components of a computer to the system unit - Explain the importance of each component - Show interest in technology and engineering	**Types of operating systems** - Windows - Linux - Android - Mac	- Discuss other types of operating systems that make a computer system to function - Distinguish between different types of operating systems that exist - Show interest in technology and engineering	- Demonstration - Discussions - Role play - Simulation - Illustrations - Projects	-Computer equipment: monitor, keyboard, mouse, printer -Charts -Locally fabricated materials
Storage devices - Universal Serial Bus (USB) - Hard disk - Memory card	- Use Windows to browse storage devices - Store and retrieve information	**Computer Ports and Devices** - Microphone - Printer - External drives	- Attach devices to the ports of a computer system unit correctly - Keep personal properties/ things in a neat and orderly manner	- Demonstration - Discussions - Role play - Simulation - Illustrations - Projects	-Computer -Printer -Earphones -USB drive, memory card, hard drive -Charts -Locally fabricated materials
ICT Productivity Tools					
Word Processing - Typing - Tables - Formatting	- Insert tables in a word document - Insert data in a document - Insert a table - Use formatting tools - Show love for aesthetics	**Benefits of a computer** - Words operations	- Explain the benefits of a computer - Use spelling and grammar check - Insert images, words and/or figures in a table - Manifest love for correct spellings and appropriate language use	-Demonstration -Discussions -Illustrations -Projects -Questions and answers	-Computer equipment: monitor, keyboard, mouse, printer -Charts, invitation cards

ICT contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units Contents	**Expected Learning Outcomes**	**Units / Contents**	**Expected Learning Outcomes**	**Teaching and Learning Strategies**	**Didactic Material**
Storage - Files - Folders - External storage devices	- Save a document - Create folders - Name and rename folders - Browse to search folders - Show love for proper organisation	**Folders** - Creating folders - Retrieving information - Naming files - Storing files	- Create folders in local or external drives - Retrieve information - Name a file - Store a file in a folder - Show love for proper organisation	-Demonstration -Discussions on pupils' experiences -Questions and answers -Simulation -Illustrations -Projects -Folders	- Computer system running with windows operating system - Charts - Pictures - Folders and documents
Powerpoint presentation - Creating slides - Inserting information in a slide	- Insert items in a Powerpoint presentation - Insert audio and video into slides - Time a slide show - Symthesize texts	**Formatting** - Page lay out - Portrait and landscape - Printing	- Set page layout - Insert tables - Insert graphs - Show love for aesthetics	-Demonstration -Discussions -Questions and answers -Simulation -Illustrations -Projects	- Computer hard and soft ware - Charts - Pictures - Models
Spreadsheets - Excel	- Insert data - Manipulate data - Create graphics - Show interest in manipulating figures	**Data management** - Data analysis - Generating simple graphs/ charts	- Use sorting functions to manipulate data - Show interest in accurate record-keeping	- Demonstration - Discussions - Role play - Simulation - Illustrations - Projects	- Computer system running with Spread Sheet software - Charts - Pictures

ICT contents, expected learning outcomes, suggested methodology and didactic materials

Internet and Communication					
CLASS 5		**CLASS 6**		**Suggested Methodology and Didactic Materials**	
Units/ Contents	**Expected Learning Outcomes**	**Units/ Contents**	**Expected Learning Outcomes**	**Teaching and Learning Strategies**	**Didactic Material**
Internet - Search engines protocols -Social Media	- Distinguish between the different search engines - Show interest for research - Identify social media platforms - Communicate through social media - Use social media responsibly	**Internet browsers** - Websites - Social media	- Carry out research - Use educative websites - Identify social media platforms - Communicate through social media - Use social media responsibly	- Demonstration - Discussions - Role-play - Simulation - Illustrations - Projects	- Charts containing pictures related to the contents - Telephones
Health, Safetly and Ethics					
Ethics - Use of telephones - Copyright	- Identify ethical values - Respect other people's privacy	**Ethics** -Use of telephone - Copy right -Plagiarism	- Respect Copyright - Explain ICT ethics - Respect communication rules	- Demonstration - Discussions - Illustrations - Projects	- Charts containing pictures related to the contents - Computers - Telephones
Electronic mail	- Create an e-mail - Communicate using an e-mail	**Electronic mail**	- Attach files - Filter information	- Demonstrations - Flipped classroom	- Computers - Phones
Computer crimes - Harassment - Scam - Theft - Spam - Malware	- Identity computer related crimes - Denounce ICT related crimes - Advise friends/peers against computer related crimes	Copyright laws and licence	- Explain basic copyright laws for internet and social media users - Respect copyright laws	- Brainstorming - Discussions - Role-play - Simulation - Illustrations	- Charts containing pictures related to the content - Computer hard and soft ware

ICT contents, expected learning outcomes, suggested methodology and didactic materials

CLASS 5		CLASS 6		Suggested Methodology and Didactic Materials	
Units/ Contents	**Expected Learning Outcomes**	**Units/ Contents**	**Expected Learning Outcomes**	**Teaching / Learning Strategies**	**Didactic Material**
Computer Viruses -Anti - Viruses	- Identify types of viruses - Distinguish the different types of anti-virus - Show interest in living a healthy life	Computer Viruses Anti - Viruses	- Identify sources of viruses - Explain preventive measure - Describe the use of anti-virus - Show interest in living a healthy life	- Brainstorming - Discussions - Questions and answers - Predictions - Role-play - Simulation - Illustrations	- Charts containing pictures related to the content - Computer hard and soft ware - Charts - Pictures - Models
Safety Measures	-Identify safety measures associated with the use of ICT devices -Apply safety measures to prevent issues that can arise from using ICT - Manifest interest in staying away from trouble	ICT maintenance	- Identify good practices associated with the use of ICTs - Practice ICT maintenance - Manifest interest in repairing objects and equipment	- Brainstorming - Discussions - Role-play - Simulation - Illustrations	- Computer hard and soft ware - Charts - Pictures - Models

Basic Notion of Computational Thinking					
Volume and Motions - Changing colours and shades - Beginning actions -Checking volume /motion	- Use colouring tools - Recognise that specific tools and colours are used to obtain desired looks	**Volume and Motions** - Changing colours and shades - Beginning actions - Checking volume /motion	- Check volumen and motion	- Brainstorming - Discussions - Role-play - Simulation - Illustrations	- Computer running with volume and motion software - Chart containing pictures related to the contents - Related textbooks
CLASS 5		**CLASS 6**		**Suggested Methodology and Didactic Materials**	
Units/ Contents	**Expected Learning Outcomes**	**Units/ Contents**	**Expected Learning Outcomes**	**Teaching / Learning Strategies**	**Didactic Material**
Arithmetic Operators - Scratch features - Variables and data	- Use scratch features - Recognise that scratch offers many creative features	**Arithmetic Operators** - Scratch features - Variables and data - Arithmetic operators	- Perform arithmetic operators - Recognise that operators play a key role in the development of computer programs	- Brainstorming - Discussions - Practice sessions - Simulation - Illustrations	- Computer running with scratch software - Chart containing pictures related to the contents - Related textbooks
Broadcast and Debugging - Conditional actions and cloning	- Create conditional actions - Recognize that conditional actions constitute the base for computer programs	**Broadcast and Debugging** - Conditional actions and cloning	- Broadcast and debug programs - Recognise that computer programs have errors that can be fixed	- Brainstorming - Discussions - Practice sessions - Simulation - Illustrations	- Computer running with broadcast and debugging software - Chart containing pictures related to the contents - Related textbooks

The Ontario Curriculum Grades 1-8 on Science and Technology: (2007).

Glossary

Assessment: It is the process of objectively understanding learners' conditions through observations and measurements in order to provide feedback to parents, learners and to some extent, pedagogic supervisors. The measurement process is meant to improve on learning outcomes. Assessment focuses more on the entire learning process rather than on the final package.

Broad-based competences: As the name implies, these are a series of competences that cut across all learning areas.

Competence: A competence is the combination of Knowledge, Skills and Attitudes (KSA) that enable learners not only to perform tasks but to behave suitably in society. These include basic KSAs needed by all primary school leavers for personal fulfilment and development, active citizenship for social inclusion and employment.

Contents: These are learning materials that make up the unit as expressed in column one of the tables that show the structure of the subjects.

Core competences to be developed: These competences are drawn from the seven core competences identified in the *National Core Skills Document* built by ministries in charge of education in Cameroon in 2012 following instructions from the Prime Minister.

Domain: The five major teaching-learning areas in the primary school. Subjects have been carved out to constitute domains. The role of the five domains is to help in the development of the seven national core skills and the four broad based competences outlined by the State in the Cameroon National Core Skills Framework.

Evaluation Criteria. These are verifiable elements in quantity and quality that make up awaited evidence or behavioural/attitudinal change to show proof of the possession of the competences developed.

Expected Learning Outcomes: (ELOs) These are behavioural and attitudinal changes to be manifested by learners in the teaching/learning process. These changes culminate in the development of competences and the learning contents are built on them.

Integrated Learning Themes: Integrated Learning Themes refer to familiar themes that guide learning. They are used to make learning real as they connect learning to real world experiences and make pupils to examine issues through different lenses. They are carefully selected from the child's physical, economic and socio cultural milieu These themes bring about logical thinking and collaboration in the teaching-learning process wherein, all the activities are seen as a whole rather than as separate chunks.

Knowledge, Skills and Attitudes (KSAs): This is a concept where learning is viewed as the acquisition of knowledge, the application of the acquired knowledge into skills and the integration of knowledge and skills to build attitudes. These three, when built within a particular time frame, develop competences in the learners.

Knowledge: Discipline specific contents. This elicits lower level thinking skills like recall and understanding.

Skills: This entails the application of knowledge. They involve hands-on/practical tasks. When these are done over and over, they create connections in the brain and allow for things to be done automatically. They involve higher level skills like application, analysis and synthesis.

Attitudes: Attitudes refer to good behaviour and "common sense" and involve acceptable behaviour in the society. In more concrete terms, attitudes have to do with proper interactions with the outer world. They also bring about personal judgment of what is common good following societal norms. Attitude culminates in character.

Profile of the learner. The profile of the learner includes all end- of-course outcomes expressed as a description of the kind of learner envisaged at the end of the primary cycle in terms of their moral, physical, social, cultural and intellectual development. It has been expressed through the seven national core skills and the four broad-based competences.

Project-based learning (PBL): This is investigative and research-based learning. Learners gain knowledge, skills and attitudes by working for an extended period of time. It is a hands-on approach to the teaching-learning process where learners are put at the centre of their own learning. They investigate and respond to authentic, engaging and complex questions, problems or challenges around them. PBL promotes critical thinking, problem-solving, communication, collaboration, self-management/self-esteem, curiosity, creativity, accountability and a sense of responsible behaviour.

Teaching learning strategies: These include the various forms of content organisation, classroom management, settings and opportunities that will be offered pupils whether as individuals or in groups to enhance learning.

Terminal learning outcomes: These are statements that describe significant and essential KSAs that learners will acquire and can be reliably demonstrated at the end of the level.

Unit: This is a major content area in a given subject. It is defined either by natural bonding or closeness of related elements. In the case of National Languages and Cultures, the units are defined following the integrated learning themes.

Weighting: This is the allocation of teaching-learning time in percentages to the different domains following their vastness and coverage in terms of needed subjects and contents.

LIST OF CONTRIBUTORS

GENERAL SUPERVISION COMMITEE

President: Mrs Youssouf née Hadidja Alim, Minister of Basic Education
Vice-President: Prof Nalova Lyonga, Minister of Secondary Education
Assisted by: Mr Ndong Soumhet Benoît, Secretary of State in the Ministry of Basic Education
Members

Prof Atemajong Justina epse Njika, IGE-MINEDUB
Prof Catherine Awoundja Nsata, IGE-MINESEC
Prof Fouda Ndjodo Marcel, Representative/MINESUP
Mr Oyono Mbarga Hervé
Mrs Tchato épse Loa Hebga Léa, Representive/MINEFOP
